

EXPLANATION

Magnetic contours
Hachures indicate closed area of lower magnetic intensity. Contour interval, 10 and 50 gammas

Flight line

A

Magnetic anomaly referred to in text

SOURCES

Data are from Aero Service Corp., Philadelphia, Pa., and from Hunting Surveys, Ltd., London, England, and are not adjusted to a uniform geographic or magnetic base. Original compilation of Aero Service Corp. survey is in an unpublished report by W. B. Agocs and C. E. Curtis. Interpretation: airborne magnetometer-scintillation counter survey in Chiangkarn-Loei, Nakhon Sawan, and Chachoengsao areas of Thailand

Aero Service Corp. base from uncontrolled air photo mosaic. Hunting Surveys, Ltd. base from U.S. Army Map Service 1:50,000 series topographic quadrangles

INTERIOR-GEOLOGICAL SURVEY, WASHINGTON, D.C.—1965—548242
Mean terrain clearances: Aero Service Corp. survey, 800 feet; Hunting Surveys, Ltd., 150 meters. Compiled by H. S. Jacobson

AEROMAGNETIC MAP OF THE LOEI-CHIANGKARN AREA, NORTHEAST THAILAND

SCALE 1:125 000
