MAP OF LIBERIA SHOWING GEOLOGIC CONTACTS INFERRED FROM GAMMA RADIATION DATA

PROFESSIONAL PAPER 518 PLATE 5

EXPLANATION
- GEOLOGIC CONTACT - Inferred from radiation level and magnetic anomaly. Studied where two contacts - indicates higher radiation, lower magnetic amplitude, and generally more basic rock - indicates lower radiation, higher magnetic amplitude, and generally less basic rock

Compiled by J.C. Belcher and C.S. Withaman

Prepared as part of the cooperative geological exploration and resources appraisal project of the Liberian Geological Survey and the U.S. Geological Survey sponsored by the Government of Liberia and the United States Agency for International Development

Base coordinates from United Nations General Assembly projection, U.S. Coast and Geodetic Survey, 1956

Scale 1:2,000,000
