GENERALIZED CHART SHOWING STRATIGRAPHIC UNITS IN MAJOR PENNSYLVANIAN DIVISIONS

[1] Narragansett basin and fault-block outliers designated as Norfolk basin, Woonsocket basin, and North Scituate basin.
[2] Upper part of Lee in northeasternmost counties of Kentucky mapped in interval B.
[3] Strata equivalent to Pedee Group are now included in lower part of Douglas Group of Kansas.
[4] *Home Creek Limestone* at top.
[5] *Winchell Limestone* at top.
[6] *Palo Pinto Limestone* at top.
[7] Of Canadian usage

NOTE

All names of stratigraphic units except those that are italicized have been adopted by the U.S. Geological Survey; however, because the nomenclature used in this publication was derived from many sources, age assignments may differ from those accepted by the Survey.

This report was prepared before the decision of the U.S. Geological Survey to put "an" and "ian" endings on provincial series terms. Therefore, the Pennsylvanian series names appear as Virgil, Missouri, Des Moines, Atoka, and Morrow in this report.
