

Note: The location of each measured section and essential stratigraphic data are listed in table 1. Individual stratigraphic sections shown in the cross sections (igs. 2-6) are identified by the abbreviated name of the 15-minute quadrangle in which the stratigraphic section lies (see pl. 1) and by number within the quadrangle. For example, the section of Chidsey Point Gully (PY-7) is section number seven in the Penn Yan 15-minute quadrangle.

STRATIGRAPHIC SECTIONS OF THE GENESSEE FORMATION AND CONTIGUOUS ROCKS IN THE VICINITY OF CANANDAIGUA AND KEUKA LAKES, NEW YORK
