

Compiled on AS-11 analytical stereoplotter from
Apollo 15 panoramic photos 320, 312

SCALE 1:10,000
CONTOUR INTERVAL 10 METERS
(WITH 5 METER SUPPLEMENTARY CONTOURS)

Horizontal and vertical control was derived from the 1:250,000 scale map Krieger (LTO 39A1). Therefore contour elevations were derived from radius vectors from the center of mass of the Moon using an arbitrary zero vertical datum of 1,730,000 meters.

EXPERIMENTAL TOPOGRAPHIC MAP OF SOUTHEAST KRIEGER AREA
