

Base from U.S. Geological Survey, 1:24 000
 Dublin, Hayward, 1973

- EXPLANATION**
- QUATERNARY DEPOSITS**
- af Artificial fill
 - ter Alluvial terrace deposits
- Boundaries of earth-flow complexes**
- ea Active within past 3 years
 - er Recently active within past 3 to 15 years
 - eo Active more than 15 years ago or earth-flow scar
- Deposits of other types of landslides**
- la Active
 - lr Recent
 - lo Old
- TERTIARY FORMATIONS—Generally covered by 2 to 4 feet of slopewash**
- bro Orinda Formation
 - brb Briones Formation
- OTHER SYMBOLS**
- Contact—Dashed where approximately located
 - Scarp—Solid where fresh; dashed where subdued. Hachures point downslope
 - Regraded earth-flow material
 - Slumping
 - Gully
 - Piping and incipient gully
 - Soil creep
 - Manmade cut
