The numbers accompanying structures are indexed to the references. Obtainable faults shown on this map do not imply fault activity or potential for future rupture of the mapped area. The map does not indicate rates or magnitude of motion on faults. The map is provided to give an overview of Quaternary geology and should not be used for specific engineering or geological purposes.

MAP REFERENCES
6. The map is dated 1981.

EXPLANATION
- Quaternary fault with known or suspected Quaternary displacement.
- Fault inferred from stratigraphy.
- Geologic lineament inferred to be a fault.

20 Principal reference describing the structure (two references listed).
