

Figure 2. Correlation plots of mean percent vitrinite reflectance ($\%R_{o(\text{mean})}$) and conodont color alteration index (CAI) values (after Nöth, 1991; Bustin and others, 1992; Königshof, 1992; Hulver, 1997). Maximum percent vitrinite reflectance ($\%R_{o(\text{max})}$) values reported by Nöth, (1991), Königshof, (1992), and Hulver (1997) were converted to mean percent vitrinite reflectance by using an equation from Zhang and Davis (1993). Data points and error bars are not shown.
