### **DATE OF DESCRIPTION** 2002

**DESCRIPTION** Proceed about 10.15 miles south along the Mammoth Hot Springs-Norris Junction highway from the post office at Mammoth Hot Springs. The bench mark is at the northeast side of Moose Flat, on the southwest edge of a parking area. On the west side of the highway in the vicinity there are three parking areas, with the station located in the middle of these (the largest one of the three, which has light gray paving). Two trails lead away from the parking area. The bench mark is on the west edge of the southern of the two trails, about 6 m south of a trash can, 129 feet southwest of the center line of the highway, 20 feet southwest of the southwest edge of the parking area, and on the top of a 5/8-inch copper coated steel rod that is driven to a depth of 115 feet and is encased in a 5-inch PVC pipe projecting about 5 inches. Station is about 3 feet below the highway.

Looking south down the trail from the parking area and the bench mark (within white PVC).

Close up of bench mark.

Looking north up the trail at the bench mark (within the white PVC), parking area, and trash can.
