USGS QUAD MAP MOUNT JACKSON (1986)

NGS PID

LATITUDE 44.66398

LONGITUDE -110.96629

ELEVATION 2063 m

DATE OF DESCRIPTION 2008

DESCRIPTION Station is located 7.3 miles east of the west entrance of Yellowstone National Park. Bench mark is about 225 ft. south of the centerline of the highway, about 200 ft. southwest of the southwest corner of the bridge over the Madison River, set in a concrete monument, and marked by a metal fence post 1.8 ft. to the south. From the bench mark it is 102.8 ft at N42E to 10" fir and 217.1 ft at N31W to 6" fir.

In 2008 the bench mark was searched for and not found. A marker on the 6-inch fir referenced in the description was found but the tree was dead and fallen. A thorough search with a metal detector did not locate mark, which is probably buried.
