USGS QUAD MAP MOUNT WASHBURN (1986)

NGS PID

LATITUDE

LONGITUDE

ELEVATION

DATE OF DESCRIPTION 2008

DESCRIPTION Station is located 4.71 mi south of Tower Junction along the Tower-Canyon highway. Bench mark is 173 ft west of the centerline of the highway, set in a concrete monument marked by a metal fence post 3.7 ft to the northwest. From the bench mark it is 66.3 ft north to twin 8" lodgepole pines and 33.6 ft at S78E to a 6" lodgepole pine.

In 2008 the bench mark was searched for and not found. Inconsistencies among the FHWA description, FHWA drawing, and current road configuration make this mark difficult to locate without searching a vast area.
