USGS QUAD MAP TOWER JUNCTION (1986)
NGS PID PY1027

LATITUDE 44.95458
LONGITUDE -110.48020
ELEVATION 2115 m

DATE OF DESCRIPTION 2008

DESCRIPTION Proceed 8.4 km (5.10 mi) west along the Mammoth-Tower highway from Tower Junction. Bench mark is in a dirt parking area on the north side of the highway, 23.2 m (76.1 ft) northeast of the centerline of the highway, 2.8 m (9.2 ft) northeast of a 20-inch dead pine tree, and above the level of the highway.

In 2008 the bench mark was searched for and not found. The 20-inch dead tree has fallen to northeast and likely buries the bench mark. A metal detector, shovel, and possibly a chain saw would be required to locate mark, but success still doubtful.

View northwest of parking area and fallen tree that likely buries bench mark.
