NGS PID PY0017

LATITUDE 44.66420586

LONGITUDE -110.4692608

ELEVATION 2368 m

DATE OF DESCRIPTION 2004

DESCRIPTION Proceed 6.2 miles south from Canyon Junction along the Canyon-Lake highway. The bench mark is on the old road, about 0.25 miles south of the new road (at a small drain crossing new road) and at a sharp bend in the alignment of the old road, 210 ft southwest of the old road and a small drain crossing and 31 ft south of the centerline of the old road. The mark is a standard disk, stamped G 11 1923 7737.455 and cemented in a boulder projecting 1 ft above ground. In 2004, only the top of the boulder into which the mark was set was visible. A thick layer of mud covered the lower part of the boulder and the mark.

Boulder into which bench mark is set (note heavy accumulation of mud).

Looking west along the old roadbed at bench mark (under person).

Looking east at bench mark (beneath person) and curve (to the left) in old roadbed.

Close up of bench mark.
