USGS QUAD MAP NORRIS JUNCTION (1986)

NGS PID PY0099

LATITUDE 44.667778

LONGITUDE -110.745833

ELEVATION 2211 m

DATE OF DESCRIPTION 2003

DESCRIPTION Proceed 5.9 mi southwest along the Madison-Norris highway from the junction at Norris. Bench mark is near the southeast end of a stone and concrete highway bridge over the Gibbon River, in the top of a triangular shaped boulder which projects 8 inches above the ground, 25 feet east of the centerline of the highway, 8 ft east of the south end of the southeast wingwall of the bridge, and about 1 ft below the level of the highway.

In 2003 the bench mark was searched for and not found, presumed destroyed by road work. It is not possible that the mark is "8 ft east of the south end of the southeast wingwall of the bridge," as stated in the NGS description.
