USGS QUAD MAP MOUNT WASHBURN (1986)

NGS PID PY0021

LATITUDE 44.767222

LONGITUDE -110.467222

ELEVATION 2607 m

DATE OF DESCRIPTION 2008

DESCRIPTION Proceed 4.0 km (2.50 mi) north along the Canyon-Tower highway from the junction at Canyon Village, thence 0.9 km (0.55 mi) northwest along an abandoned road bed. Bench mark is at the base of a rock ledge, 9.7 m (31.8 ft) south of the west end of a pipe culvert, 7.6 m (24.9 ft) west of the center of a paved road, and about level with the road.

In 2008 the bench mark is searched for with a metal detector and not found. The bench mark is likely buried under colluvium or destroyed. At 0.45 mi along the abandoned road bed there is a culvert but no pipe. If the bench mark is nearby, it is likely buried near the base of a large tree. At 0.55 mi there is a large barrow pit. If the bench mark was near that location, it has almost certainly been destroyed.
