USGS QUAD MAP MADISON JUNCTION (1986)

NGS PID PY0088

LATITUDE 44.650556

LONGITUDE -110.828611

ELEVATION 2094 m

DATE OF DESCRIPTION 2003

DESCRIPTION Proceed 11.7 mi southwest along the Madison-Norris highway from the junction at Norris (alternatively, 1.65 mi northeast from the junction at Madison). Bench mark is set in the top of a large boulder which projects 2.5 ft, 17 ft southeast of the centerline of the highway, 89 ft east-northeast of the Tuff Cliff exhibit panel and parking area, 5.5 ft west of a large forked fir tree, and about 2 ft below the highway.

In 2003, the bench mark was searched for and not found, presumed destroyed by road work. If the bench mark was only 17 ft from the highway (as stated in the NGS description), then it was almost certainly destroyed when the road was repaved and widened.
