USGS QUAD MAP WEST YELLOWSTONE (1986)

NGS PID PY0351

LATITUDE

LONGITUDE

ELEVATION

DATE OF DESCRIPTION 2004

DESCRIPTION Proceed 0.30 km (0.20 mi) east along Yellowstone Ave. from the Museum of the Yellowstone in West Yellowstone, MT, to the intersection with Boundary St. and a triangle formed by three roads on the south side and a large stone monument with the Union Pacific railroad logo, 18.6 m (61.0 ft) west of the centerline of the north-south street, 4.1 m (13.5 ft) south of the centerline of a road angling off of Yellowstone Ave., 24.6 m (80.7 ft) south of the centerline of Yellowstone Ave. and 4 m (13.1 ft) southwest of the southwest edge of the stone monument, set on a rod 20 cm (8 inch) below the ground level. NGS description indicates damage to bench mark, but that it seems to be holding its elevation.

In 2004 this bench mark was searched for and not found. The bench mark is presumed destroyed, since the Union Pacific monument has been landscaped. If the bench mark exists, it is under grass.
