USGS QUAD MAP TOWER JUNCTION (1986)

NGS PID PY1033

LATITUDE 44.92122

LONGITUDE -110.44134

ELEVATION 2046 m

DATE OF DESCRIPTION 2008

DESCRIPTION Proceed 1.9 km (1.20 mi) west along the Mammoth-Tower highway from the ranger station in Tower Junction. Bench mark is 11.9 m (39.0 ft) west of the center of the petrified tree road, 8.0 m (26.2 ft) south of the centerline of the highway, and about level with the highway. Access to datum point is had through a 5-inch logo cap.

In 2008 the bench mark was searched for and not found. A thorough search with a metal detector turned up nothing at the site referenced in the NGS description. The area looks disturbed by digging, so the bench mark is presumed destroyed.
