Figure 9. Seasonality of temperature and precipitation for Canada and the continental United States mapped as four panels with maps of the quartiles of temperature seasonality (MTWA– MTCO, mean temperature of the warmest month–mean temperature of the coldest month); the quartiles of precipitation seasonality (MPDR/MPWE, mean precipitation of the driest month/mean precipitation of the wettest month) mapped within each panel. Q, quartile. USGS Prof. Pap. 1650–G
