

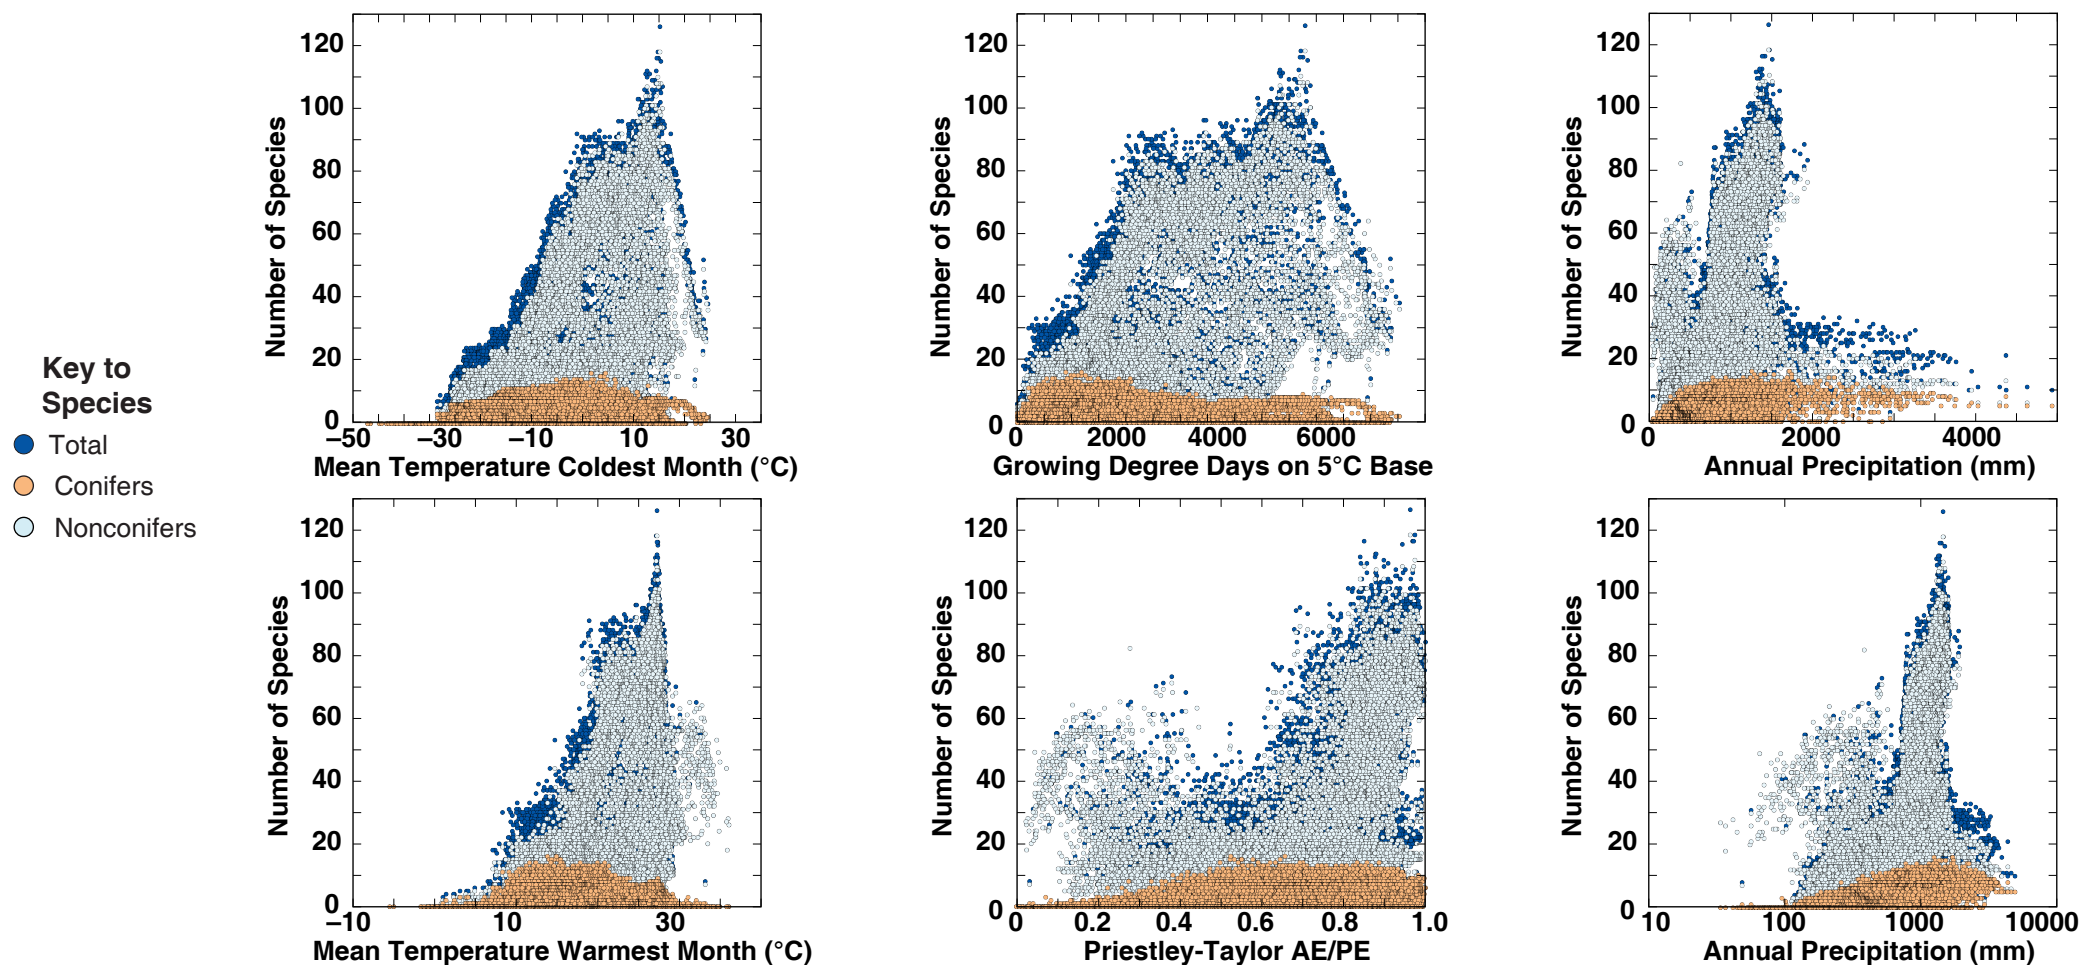

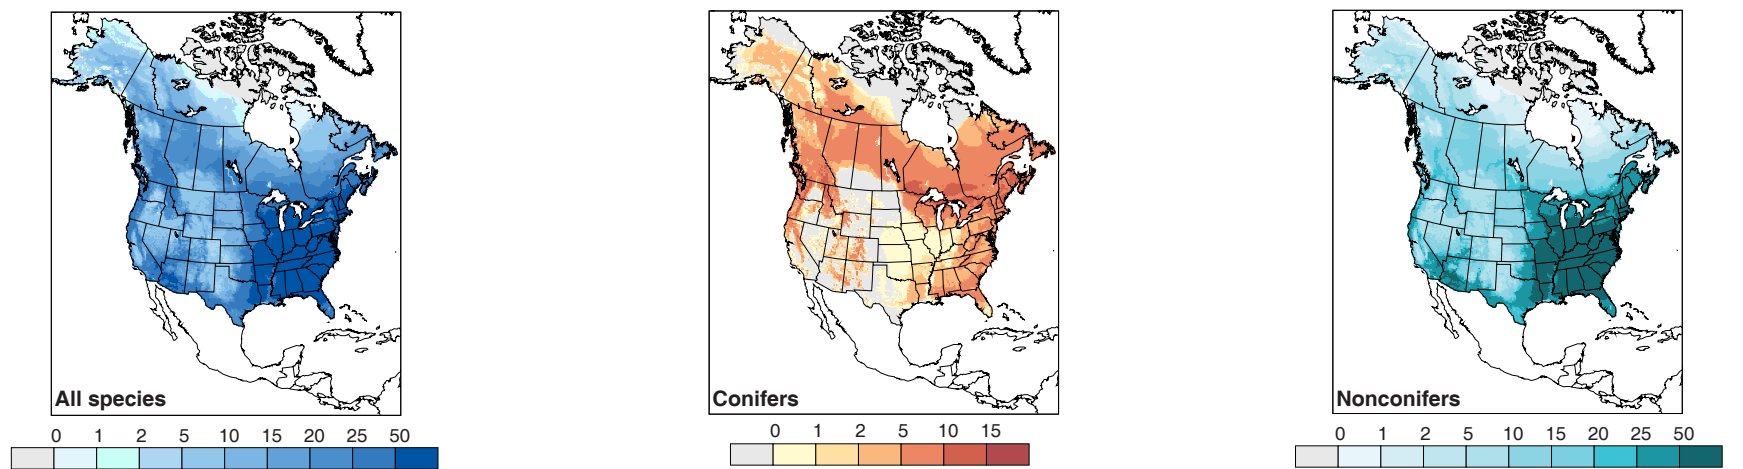

Figure 10. Species richness for the taxa included in this volume for all taxa (left map, dark blue on scatterplots), conifers (middle map, orange on scatterplots), and nonconifers (right map, light blue on histograms). On the scatterplots the conifer data are plotted in the top layer, the nonconifer data in the middle layer, and the data for all taxa in the bottom layer. °C, degrees Celsius; mm, millimeters; AE/PE, mean actual evaporation divided by potential evaporation.
