

***Pinus edulis* Engelm.**
Accepted name: *Pinus edulis* Engelm.
Common name: pinyon
Number of grid points: 364

Primary source(s):
Little (1971)

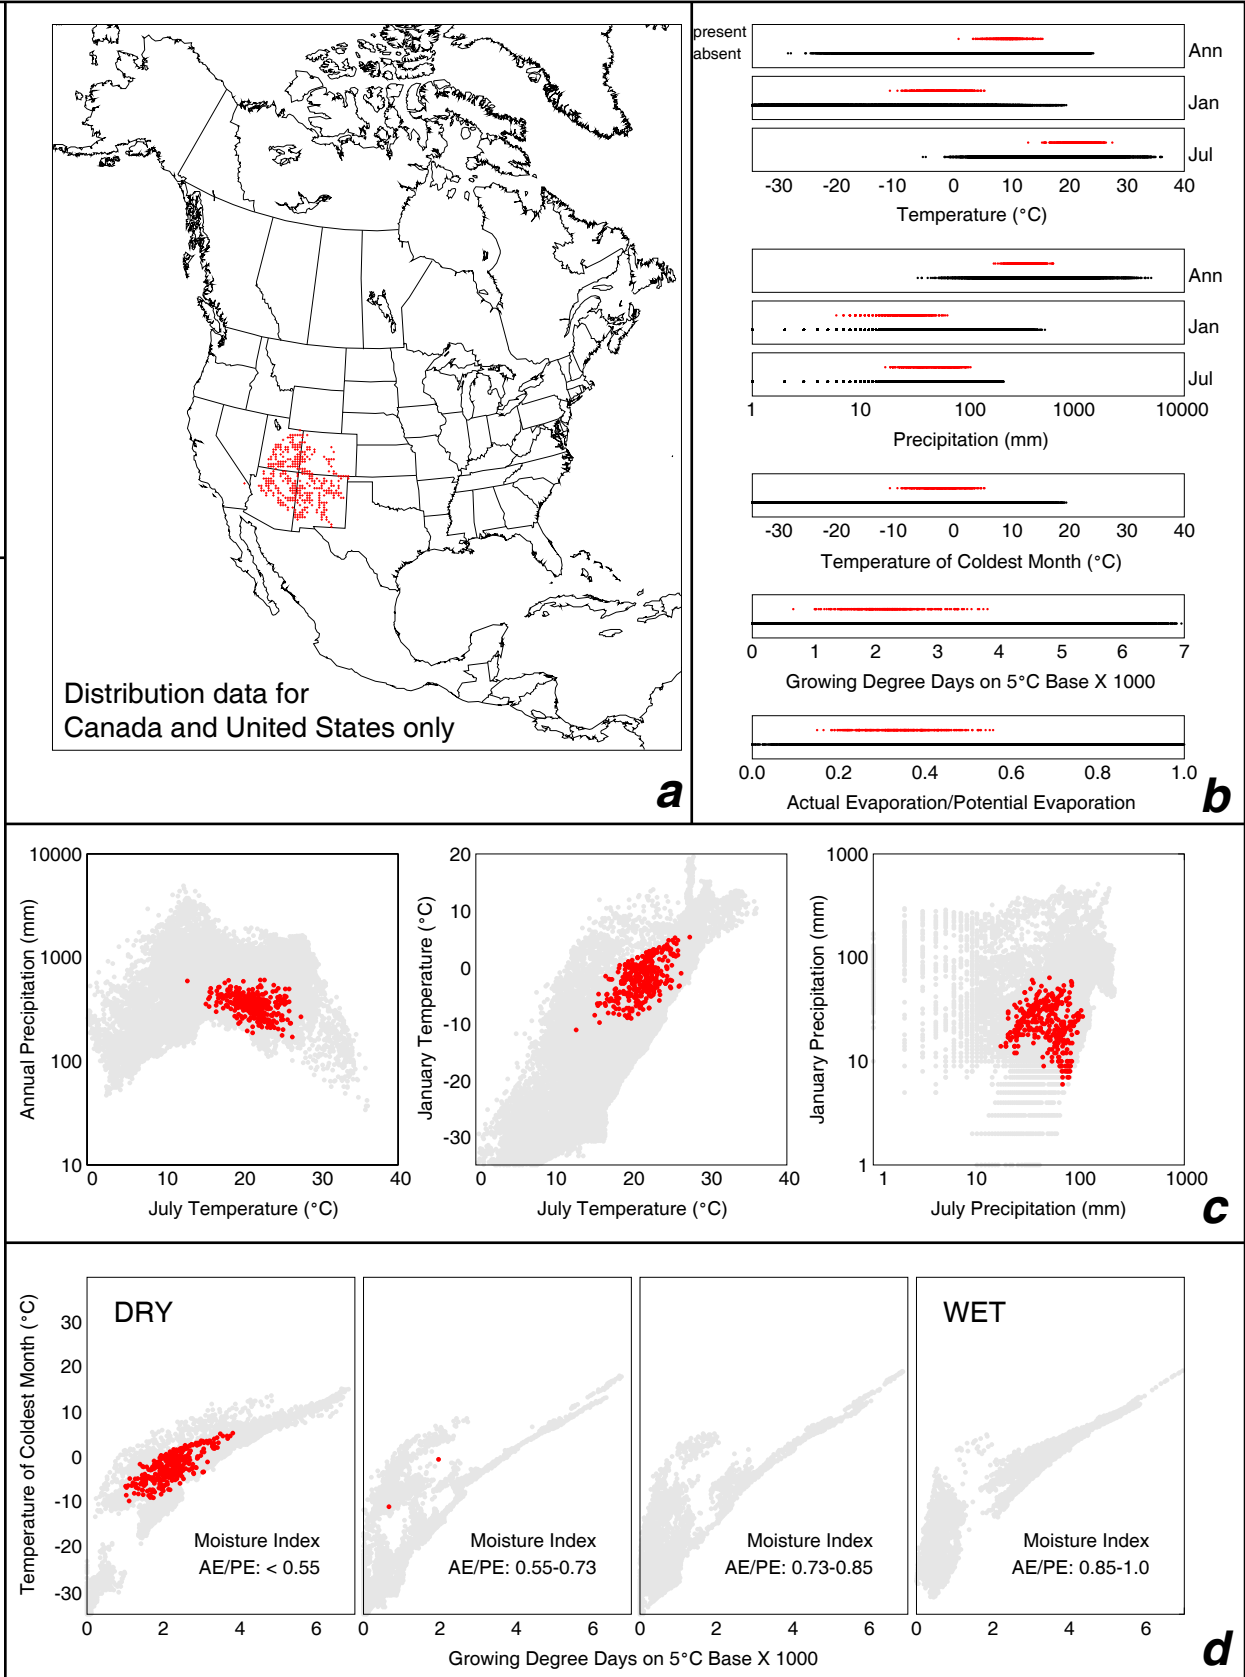

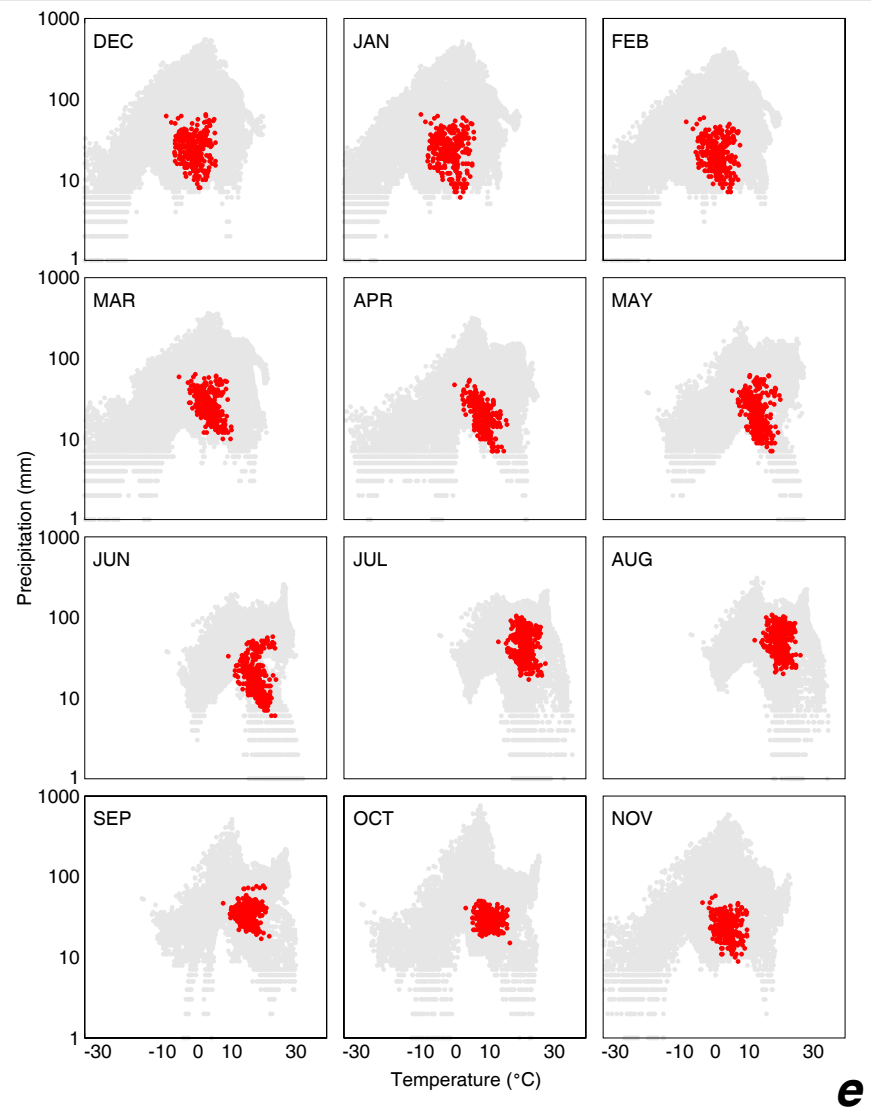

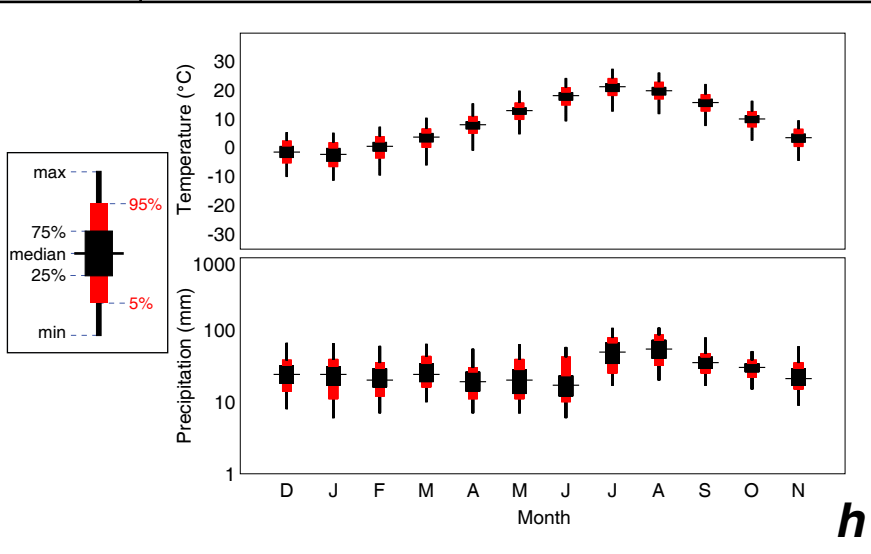

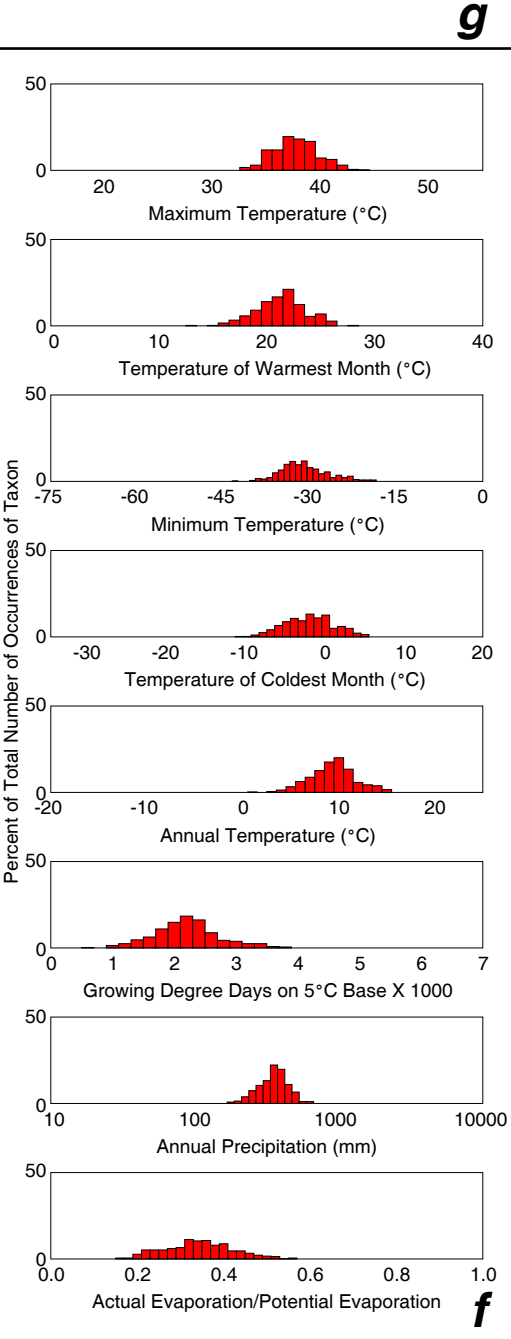

Figure 12. Example graphical display (Atlas Page) for *Pinus edulis*. The boxes with letters in the lower right corner delimit parts of the display for comparisons among selected species in subsequent figures. The right half of this display portrays the same information as in graphical displays of previous volumes; the left half adds histograms and information on monthly climatic variables. The boxes are labeled clockwise from the upper center of the display; and in boxes *c* through *f*, the points where the taxon is present are plotted in red on top of points where the taxon is absent (in gray). °C, degrees Celsius; mm, millimeters; %, percent; max, maximum; min, minimum; Ann, annual; Jan, January; Jul, July; AE/PE, mean actual evaporation divided by potential evaporation.
