Kaumana, Waiʻakea, and Volcano-Mountain View Inundation Zones

By
Frank A. Trusdell and Michael H. Zoeller

2017

WARNING: Lava flow inundation analysis only valid for lava flows once they have exited the rift zone.b

a. Differences in rendering processes and pixel resolution, some slight distortion of scale may occur when printed at its intended publication scale. This map or plate is offered as an online-only, digital publication. Users should be aware that, because of the nature of the digital format, some slight distortion of scale may occur when printed at its intended publication scale. Limitation of liability: The U.S. Geological Survey provides this publication as is, without warranty of any kind, expressed or implied.

b. Inundation analysis limited to flow only in the initial months after a lava flow exits the rift zone. Analysis does not account for potential large-scale changes in terrain and probably underestimates true inundated area.
