

Appendices

Appendix 1 and 2

Purpose, Data Sources, and Limitations

Appendix 1 provides water-use data for each Florida county for the period 1965-2000; appendix 2 provides water-use data for each water management district for the period 1975-2000. These tables provide a summary of all water-use data collected since 1965 (published or not published) for each category by the many different agencies involved in water-use compilations throughout the State. Since 1965, water-use data have been collected and compiled on various levels by the Florida Bureau of Geology, Florida Department of Environmental Protection, Northwest Florida Water Management District, St. Johns River Water Management District, South Florida Water Management District, Southwest Florida Water Management District, Suwannee River Water Management District, and U.S. Geological Survey. Prior to 1965, water-use data were only collected and published on a Statewide level. Some county data are available prior to 1965 and are published in the Florida Bureau of Geology regional or county-wide water-resource investigations. However, these data are often not consistent from one county or category to another. All totaled, data presented in appendix 1 and 2 were compiled from nearly 60 publications and countless unpublished data files.

The appendix in this report is the second effort to present all available water-use data by county and water management district. Historical data were summarized and published in 1995

for the period between 1965 and 1990 by the USGS (Marella, 1995). The tables presented in this appendix will provided the most recent data for the years between 1990 and 2000 and also will include any data modifications for the period between 1965 and 1990. Some additional data have been added to these tables that depict the amount of public-supply water treated and the amount of water used for recreational irrigation (including golf courses). These tables are available to download from the USGS web site: http://fl.water.usgs.gov/Water-Use/Water_Use_web/index.htm.

Water withdrawals and use data presented herein represent the average daily quantities used, as derived from annual data, and are expressed in million gallons per day (Mgal/d). Water-use values are reported to two places to the right of the decimal or to the nearest 10,000 gallons per day (gal/d). Water-use data herein may not be identical to the water-use data published by the water management districts or FDEP because of differences in data-collection procedures, categories, methodology, or changes made after publishing.

Data collected between 1975 and 2000 by the water management districts for individual counties are for the portion of the county within that district. If a county is within two water management districts and only one district compiled data, then the county totals are not complete, and therefore, they are only published or presented for that district. No partial county data are presented in these tables, only complete county data sets unless otherwise noted.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District, Palatka.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

Public supply transfers represent water withdrawn in Orange County and imported for use in Brevard County.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District, Palatka.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and St. Johns River Water Management District (2004).

Public supply treated includes water that does not meet public drinking water standards and is either treated through a desalination process or is diluted with fresher water to meet standards.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Charlotte County is located within the South Florida and the Southwest Florida Water Management Districts. The values shown represent the County totals as reported by the Districts.

Public supply transfers represent water withdrawn in DeSoto County and imported for use in Charlotte County.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965-1984 and 1986-1989.

Data source: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee, and published data from the Southwest Florida Water Management District, Brooksville.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and Southwest Florida Water Management District (2002).

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District, Palatka.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and St. Johns River Water Management District (2004).

Public supply treated includes water that does not meet public drinking water standards and is either treated through a desalination process or is diluted with fresher water to meet standards. The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee, Florida.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

Public supply transfers represents water withdrawn in DeSoto County and exported for use in Charlotte and Sarasota Counties and includes transfer losses.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965-1984 and 1986-1989.

Data source: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1990-1994, and 1996-1999 - published water-use data from the Southwest Florida Water Management District, Brooksville.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and Southwest Florida Water Management District (2002).

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

Appendix 1. Freshwater withdrawals by category in Duval County, 1965-2000 (Continued)

Public supply transfers represent water withdrawn in Escambia County and exported for use in Santa Rosa County.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District, Palatka.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and St. Johns River Water Management District (2004).

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

Appendix 1. Freshwater withdrawals by category in Glades County, 1965-2000 (Continued)

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965-1984 and 1986-1989.

Data source: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee, and published data from the Southwest Florida Water Management District, Brooksville.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and Southwest Florida Water Management District (2002).

Appendix 1. Freshwater withdrawals by category in Hendry County, 1965-2000 (Continued)

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965-1984 and 1986-1989.

Data source: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee, and published data from the Southwest Florida Water Management District, Brooksville.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and Southwest Florida Water Management District (2002).

Highlands County is located within the South Florida and the Southwest Florida Water Management Districts. The values shown represent the County totals as reported by the Districts.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965-1984 and 1986-1989.

Data source: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee, and published data from the Southwest Florida Water Management District, Brooksville.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and Southwest Florida Water Management District (2002).

Public supply transfers represent water withdrawn in Hillsborough County and exported for use in Pinellas County and includes transfer losses.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965-1984 and 1986-1989.

Data source: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee, and published data from the Southwest Florida Water Management District, Brooksville.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and Southwest Florida Water Management District (2002).

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

Appendix 1. Freshwater withdrawals by category in Indian River County, 1965-2000 (Continued)

Public supply treated includes water that does not meet public drinking water standards and is either treated through a desalination process or is diluted with fresher water to meet standards.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District, Palatka.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and St. Johns River Water Management District (2004).

Jefferson County is located within the Northwest Florida and Suwannee River Water Management Districts. The values shown represent the county totals as reported by the Districts.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

Lake County is located within the St. Johns River and the Southwest Florida Water Management Districts. The values shown represent the County totals as reported by the Districts.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1989.

Data sources: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District and the Southwest Florida Water Management District.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004), St. Johns River Water Management District (2004), and the Southwest Florida Water Management District (2002).

Public supply treated includes water that does not meet public drinking water standards and is either treated through a desalination process or is diluted with fresher water to meet standards. The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted from under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

Levy County is located within the Southwest Florida and the Suwannee River Water Management Districts. The values shown represent the County totals as reported by the Districts.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data source: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

Public supply transfers represent water withdrawn in Manatee County and exported for use in Sarasota County.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965-1984 and 1986-1989.

Data source: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee, and published data from the Southwest Florida Water Management District, Brooksville.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and Southwest Florida Water Management District (2002).

Marion County is located within the St. Johns River and the Southwest Florida Water Management Districts. The values shown represent the County totals as reported by the Districts.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965-1984 and 1986-1989.

Data source: 1965 - 1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991 - 1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District and the Southwest Florida Water Management District.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004), St. Johns River Water Management District (2004), and the Southwest Florida Water Management District (2002).

Public supply treated includes water that does not meet public drinking water standards and is either treated through a desalination process or is diluted with fresher water to meet standards. The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

Public supply transfers represent water withdrawn in Miami-Dade County and exported for use in Monroe County.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural self-supplied includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) purposes. This category was accounted for under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

Public supply transfers represent water withdrawn in Miami-Dade County and imported for use in Monroe County.

Agricultural self-supplied includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) purposes. This category was accounted for under Agricultural from 1965 through 1974.

Ground water withdrawn for public supply and recreational irrigation in Monroe County may be saline water and is usually treated through a desalinations process for use.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District, Palatka.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and St. Johns River Water Management District (2004).

Okeechobee County is located within the St Johns River and South Florida Water Management Districts. The values shown represent the County totals as reported by the Districts.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

Appendix 1. Freshwater withdrawals by category in Orange County, 1965-2000 (Continued)

[Compiled by the U.S. Geological Survey, Tallahassee, all values in million gallons per day; ----, no or partial data were available; N/A, totals not available]

Orange County is located within the St Johns River and South Florida Water Management Districts. The values shown represent the County totals as reported by the Districts.

Public supply transfers represent water withdrawn in Orange County and exported for use in Brevard County.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural self-supplied includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) purposes. This category was accounted for under Agricultural from 1965 through 1984.

Data sources: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

Public supply treated includes water that does not meet public drinking water standards and is either treated through a desalination process or is diluted with fresher water to meet standards.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Public supply transfers represent water withdrawn in Pasco County and exported for use in Pinellas County.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965-1984 and 1986-1989.

Data source: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee, and published data from the Southwest Florida Water Management District, Brooksville.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and Southwest Florida Water Management District (2002).

Polk County is located within the St. Johns River, South Florida and the Southwest Florida Water Management Districts. The values shown represent the County totals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data source: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District and the Southwest Florida Water Management District.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004), St. Johns River Water Management District (2004), and the Southwest Florida Water Management District (2002).

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources: 1965 -1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991 -1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District, Palatka.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and St. Johns River Water Management District (2004).

Public supply treated includes water that does not meet public drinking water standards and is either treated through a desalination process or is diluted with fresher water to meet standards.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Public supply treated includes water that does not meet public drinking water standards and is either treated through a desalination process or is diluted with fresher water to meet standards.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources: 1965 -1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991 -1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District, Palatka.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and St. Johns River Water Management District (2004).

Appendix 1. Freshwater withdrawals by category in Santa Rosa County, 1965-2000 (Continued)

Public supply transfers represent water withdrawn in Escambia County and imported for use in Santa Rosa County.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District, Palatka.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and St. Johns River Water Management District (2004).

Water withdrawals for mining operations were classified as ground water between 1965 and 1990, and were re-classified as surface water beginning in 1991.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965-1984 and 1986-1989.

Data source: 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee, and published data from the Southwest Florida Water Management District, Brooksville.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and Southwest Florida Water Management District (2002).

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Power generation withdrawals for 1996-99 do not include all fresh surface water withdrawn within the County.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District, Palatka.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and St. Johns River Water Management District (2004).

Appendix 1. Freshwater withdrawals by category in Wakulla County, 1965-2000 (Continued)

[Compiled by the U.S. Geological Survey, Tallahassee, all values in million gallons per day; ----, no or partial data were available; N/A, totals not available]

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1965 through 1984.

Power generation withdrawals include all surface water withdrawn for power generation within the County as the water may have been reported as saline in past years.

Data sources; 1965-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

Public supply treated includes water that does not meet public drinking water standards and is either treated through a desalination process or is diluted with fresher water to meet standards.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1975 through 1984.

Data sources; 1975-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - USGS unpublished water-use data files, Tallahassee.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004).

Values presented in this table may not be identical to those reported or published by the water management district due to differences in data-collection procedures, categories of use, or revisions in reported or published values.

Public supply treated includes water that does not meet public drinking water standards and is either treated through a desalination process or is diluted with fresher water to meet standards.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1975 through 1984.

Surface-water values for power generation for 1991-94 and 1996-99 do not include all of the fresh surface water withdrawn for power generation within the District.

Data sources: 1975-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, 1996-1999 - Published water-use data from the St. Johns River Water Management District, Palatka.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and St. Johns River Water Management District (2004).

Values presented in this table may not be identical to those reported or published by the water management district due to differences in data-collection procedures, categories of use, or revisions in reported or published values.

Public supply treated includes water that does not meet public drinking water standards and is either treated through a desalination process or is diluted with fresher water to meet standards.

Water withdrawals for mining operations were classified as ground water between 1965 and 1990, and were re-classified as surface water beginning in 1991.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1975-1984 and 1986-1989.

Surface-water values for power generation for 1991-94 and 1996-99 do not include all of the fresh surface water withdrawn for power generation within the District.

Data sources: 1975-1990 - Modified from USGS Open-File Report 94-521 (Marella, 1995).

1991-1994, and 1996-1999 - published water-use data, Southwest Florida Water Management District, Brooksville.

1995 - USGS Water-Resources Investigations Report 99-4002 (Marella, 1999).

2000 - USGS Scientific Investigations Report 2004-5151 (Marella, 2004) and Southwest Florida Water Management District (2002).

Appendix 2. Freshwater withdrawals by category, Suwannee River Water Management District, Florida, 1975-2000 (Continued)

[Compiled by the U.S. Geological Survey, Tallahassee, all values in million gallons per day; ----, no or partial data were available; N/A, totals not available]

Public supply treated includes water that does not meet public drinking water standards and is either treated through a desalination process or is diluted with fresher water to meet standards.

The procedure used to estimate domestic self-supplied withdrawals changed for 2000 from previous years as a different per capita was used to calculate withdrawals.

Agricultural includes water withdrawn for crop irrigation, livestock, and fish farming purposes.

Recreational includes water used for all turf grass (golf, commercial, industrial, and public) irrigation. This category was accounted for under Agricultural from 1975 through 1984.
