

**Hayman wildfire area**  
**6/27/02**

The Hayman Perimeter source scale is approximately 1:24,000.  
The Burn Perimeter on this map is for reference purposes only  
and is not an exact representation.

**POST-WILDFIRE HAZARD MITIGATION MAP**  
**THIS MAP IS TO BE USED FOR ADVISORY PURPOSES ONLY.**

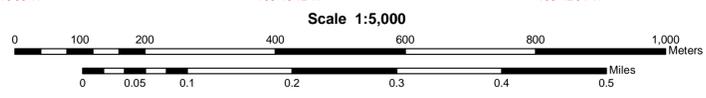

The Post-Wildfire Hazard Mitigation Map has been developed on the basis of hydrologic, engineering, and surveying studies within and adjacent to the hazard area. This map is provisional and is to be considered temporary in nature; it reflects short-term (1 to about 3 years) conditions of the post-fire watershed or study area. Flood-plan delineations are based on computed water surface elevations at surveyed cross sections; flood-plan boundaries between cross sections are interpolated on the basis of topographic contours and are approximate. This map is not intended to affect in any way those maps used by the Federal Emergency Management Agency (for example, Flood Insurance Rate Maps) or United States Geological Survey (USGS) maps for purposes of flood insurance or other programs. For further information or clarification, please contact Federal Emergency Mapping Agency at (303) 235-4909, the USGS at (303) 202-4008, or the Colorado Water Conservation Board at (303) 866-3441.

Map projected to the North American Datum of 1927 (NAD27).  
Projection Universal Transverse Mercator, Zone 13.

The Hayman fire perimeter was generated by the USDA Forest Service,  
compiled on June 27, 2002.

Baselayer is *The National Map* Orthoimagery taken in May 2002.

Hayman 100-year flood plain generated by the U.S. Geological Survey, revised 2003.

EXPLANATION	
	South Platte River 100-year flood plain
	Hayman fire perimeter
	South Platte River cross sections, datum is NAVD 88
	Section number
	River cross-section identification numbers as presented in Appendix 2, table 2-3

Map produced at the USGS Rocky Mountain Mapping Center in cooperation with the Federal Emergency Management Agency for the Post-Wildfire Hazards Interagency Group.
