

Appendix. Graphical and Statistical Summaries of Water Levels from Wells in Georgia

The following are summary pages for continuously monitored wells cited in this report. The pages include information on well location (including elevation), well construction, the hydrographs of daily mean water level for 2005 and period-of-record monthly mean water level. In addition, summary statistics are presented graphically and in tables including monthly minimum, maximum and mean for 2005 and the period of record. Readers are cautioned, although summary statistics are presented for all wells, these statistics may not be representative for wells with a period of record of less than 5 years.
