Notes:

1) Weather source refers to the source of daily rainfall and ET climate data for soil moisture balance calculations. Normally is at the particular subdivision, but in case of missing local subdivision weather station data can be COAGMet or OM station.

Chipeta Pines Station: the local weather station at the Chipeta Pines subdivision, physically located at site 6 (fig. 1, table 1) Paradise Hills Station: the local weather station at the Paradise Hills subdivision, physically located at site 13 (fig. 1, table 1)

Quail Run Station: the local weather station at the Quail Run subdivision, physically located at site 13 (lig. 1, to Quail Run Station: the local weather station at the Quail Run subdivision, physically located at site 18 (fig. 1, table 1)

Grandview Station: the local weather station at the Grandview subdivision, physiclly located at site 22 (fig. 1, table 1)
Canyonview Park: there was no local weather station, all weather data was from G.I.COAGMet

Canyonview Park: there was no local weather station, all weather data was from GJ COAGMet

OM Station = CSU Orchard Mesa Experiment Station Campbell Scientific Weather Station (this station was not web-linked in 2005, but became linked in 2006 as the Orchard Mesa COAGMET station URL: http://ccc.atmos.colostate.edu/~coagmet/)

GJ COAGMET = CSU Grand Junction COAGMET web-linked Weather Station (URL: http://ccc.atmos.colostate.edu/~coagmet/)

2) HEC-HMS refers to Army Corps of Engineers Hydrologic Engineering Lab Hydrologic Modeling System (URL: http://www.hec.usace.army.mil/software/hec-hms/)

	Chipeta Pines	Chipeta Pines Rainfall	Chipeta Pines HEC- HMS runoff	Paradise Hills Weather	Paradise Hills Rainfall	Paradise Hills HEC- HMS runoff	Quail Run	Quail Run Rainfall	runoff	Grandview	Grandview Rainfall	Grandview HEC-HMS runoff	Canyonview Park Weather	Canyonview Park Rainfall	Canyonview Park HEC- HMS runoff
