2006 Weather Data and Sources for Urban Study Sites

Notes:
1) Weather source refers to the source of daily rainfall and ET climate data for soil moisture balance calculations. Normally is at the particular subdivision, but in case of missing local subdivision weather station data can be COAGMet or OM station.
Chipeta Pines Station: the local weather station at the Chipeta Pines subdivision, physically located at site 6 (fig. 1, table 1)
Paradise Hills Station: the local weather station at the Paradise Hills subdivision, physically located at site 21 (fig. 1, table 1)
Quail Run Station: the local weather station at the Quail Run subdivision, physically located at site 18 (fig. 1, table 1)
Grandview Station: the local weather station at the Grandview subdivision, physicly located at site 12 (fig. 1, table 1)
Canyonview Park: there was no local weather station, all weather data was from GJ COAGMet
OM COAGMet = CSU Orchard Mesa COAGMet web-linked Weather Station (URL: http://ccc.atmos.colostate.edu/~coagmet/)
GJ COAGMet = CSU Grand Junction COAGMet web-linked Weather Station (URL: http://ccc.atmos.colostate.edu/~coagmet/)
2) HEC-HMS refers to Army Corps of Engineers Hydrologic Engineering Lab Hydrologic Modeling System (URL: http://www.hec.usace.army.mil/software/hec-hms/)
