

Sources and Preparation of Data for Assessing Trends in Concentrations of Pesticides in Streams of the United States, 1992–2006

U.S. Geological Survey Scientific Investigations Report 2009–5062

List of figures in Appendix 2

All of the 52 figures in Appendix 2 are in the same format, each one representing a different pesticide. The common caption on each is as follows:

Timeseries plots of nondetections of the given pesticide for all sites in the trend data set showing (1) original reporting levels; (2) rounded reporting levels and, for routine nondetections, reporting levels reassigned to the maximum value of the long-term method detection level (maxLT–MDL); and (3) raised reporting levels adjusted for temporal changes in recovery. Temporal changes in recovery are shown in panel 2 of the figures in appendix 3.

Chemicals corresponding to each figure are as follows:

Figure A2–1	acetochlor
Figure A2–2	alachlor
Figure A2–3	atrazine
Figure A2–4	azinphos–methyl
Figure A2–5	benfluralin
Figure A2–6	butylate
