

Adjustment of Pesticide Concentrations for Temporal Changes in Analytical Recovery, 1992–2006

U.S. Geological Survey Scientific Investigations Report 2009–5189

List of figures in appendix 7

All of the 52 figures in appendix 7 are in the same format, each one representing a different pesticide or degradate. The common caption on each is as follows:

Distribution of residual errors in modeled recovery of acetochlor for selected stream–water sites. The number of matrix spikes is shown at the bottom of the boxplot. An asterisk at the top of the boxplot indicates sites where mean residual error (1) is significantly different from 0 ($p < 0.01$) and (2) differs from 0 by more than 10 percent. Study Units are identified in figure 7. Boxplots are explained in figure 1. (Residual errors greater than 100 percent or less than –100 percent are not shown).

Chemicals corresponding to each figure are as follows:
