

Errata Sheet

SIR 2011–5144 – Peak-Flow Characteristics of Virginia Streams

Subsequent to publication of U.S. Geological Survey Scientific Investigations Report 2011–5144, "Peak-Flow Characteristics of Virginia Streams," the following errors were found in map figure 1 on page 2 of the report.

1. The extent of the Blue Ridge Physiographic Province, shown as a blue-shaded area, did not conform to the adapted physiography used in the study.
2. The caption text identifying physiography was incomplete.
3. Several black dots identifying peak-flow site locations were misplaced.

These errors have been corrected in a revised map figure. The incorrect map figure was replaced in the online version of the report on April 30, 2013.

We apologize for any inconvenience these errors may have caused.
