

Revision History

Publication Series and Series Number: SIR 2014–5150
 Publication Title: Hydrologic Models and Analysis of Water Availability in Cuyama Valley, California
 Publication Authorship: R.T. Hanson, L.E. Flint, C.C. Faunt, D.R. Gibbs, and Wolfgang Schmid
 First Version and Date of First Release: 1.00 August 14, 2014
 Current Version and Date of Current Release: 1.10 May 29, 2015

Summary of Product Components

Component	Description	Last revised in pub version	Date of last revision
Manuscript	Groundwater storage values	1.10	May 29, 2015
Tables (1 total)	Summary of groundwater-flow budgets for selected regions and periods from the Cuyama Valley Hydrologic Model	1.10	May 29, 2015

Historical List of Revisions (latest version first)

Version 1.10 – May 29, 2015

Manuscript Section: Hydrologic Budget and Flow Analysis–

Modified sentence on page 32.

Corrected groundwater storage values on page 32.

Manuscript Section: Projection of Potential Water Availability–

Corrected groundwater storage values on page 33.

Manuscript Section: Table 16–

Added information to table headnote.

Corrected values in columns.
