Flood-Inundation Map for Prattsville, New York, Corresponding to a Stage of 12.0 Feet and Elevation of 1,142.96 Feet (NAVD 88) at U.S. Geological Survey Streamgage 01350000 on the Schoharie Creek

By

Elizabeth A. Nystrom

2016

EXPLANATION

- Flood-inundation area
- USGS streamgage and number
- Limits of study area
- Flow arrow—Indicates direction of water flow
- State Route
- County Route

UNCERTAINTIES AND LIMITATIONS FOR USE OF FLOOD-INUNDATION MAPS

Although the flood-inundation maps represent the boundaries of inundated areas with a distinct line, some uncertainty is associated with these maps. The flood boundaries shown were delineated based on water-surface elevation and discharge at selected USGS streamgages. Water-surface elevations along the stream reaches were estimated by steady-state hydraulic modeling, assuming unobstructed flow, and using streamflows and hydrologic conditions anticipated at the USGS streamgage. Additional errors may be introduced due to uncontrolled conditions such as changes in the streambed elevation or roughness, backwater from major tributaries along a main stem river, or backwater from localized debris or ice jams. The accuracy of the floodwater extent portrayed on these maps will vary with the accuracy of the input data and the assumptions made during the hydraulic modeling process.

The USGS provides these maps "as-is" for a quick reference, emergency planning tool but assumes no legal liability or responsibility resulting from the use of this information.

DISCLAIMER

Inundated areas shown should not be used for navigation, regulation, permitting, or other legal purposes.

ANY USE OF TRADE, PRODUCT, OR FIRM NAMES IS FOR DESCRIPTIVE PURPOSES ONLY AND DOES NOT IMPLY ENDORSEMENT BY THE U.S. GOVERNMENT.
