

EXPLANATION

- Assessment tract type – jasperoid precious metal**
- Moderate (M) potential tracts with low (B) certainty
 - Jasperoid exposures
 - Challis volcanics
- Base data**
- USGS study area boundary
 - Proposed withdrawal areas
 - County boundaries

Figure 23. Inset map showing details of mineral-resource-potential tracts for jasperoid precious-metals occurrences in context of permissive geology in the central part of the study area for the North-Central Idaho Sagebrush Focal Area.
