

Figure 24. Maps showing predicted distribution of the X and Y bentonite beds in the Malta, A, and Glasgow, B, areas, Montana. Category -15 to 3 represents the area where the interval between the bottom of the X bed and the top of the Y bed could be exposed. Category 3.1 to 15 represents the area where the Y bed is overlain by less than 3.6 m of overburden. USGS, U.S. Geological Survey.
