

Part of seismic-reflection profile S1 from *A* to *A'*.
No attributes have been applied to this version of profile S1

Display of high-probability fault attributes (vertical black lines) overlain on part of seismic profile S1 from *A* to *A'*

Display of high-probability chimney attributes (blue-green-yellow vertical lines) indicative of the probability of vertical fluid-migration pathways overlain on part of seismic profile S1 from *A* to *A'*

EXPLANATION

 Fault attributes (high probability of faulting and fracturing) as vertical black lines

 Chimney attributes (high probability of vertical fluid-migration pathways) as blue, green or yellow vertical lines

 Test corehole and identifier

Horizon **A1**
Seismic horizon and alphanumeric identifier

C6
Seismic-sag structures—Numbered locations C6 and C7

A1/V
Average interval velocity

ft/s
Feet per second

SS Ar7 Seismic sequence Ar7

SS A6 Seismic sequence Ar6

SS A5 Seismic sequence Ar5

CSS Ar1 Composite seismic sequence Ar1

SS AP3 Seismic sequence AP3

SS AP2 Seismic sequence AP2

SS AP1 Seismic sequence AP1

SS O3 Seismic sequence O3

Multi-Attribute Fault and Chimney Analyses of a Seismic-Reflection Profile Along the Hillsboro Canal, Eastern Broward County, Florida

This map was printed on an electronic plotter directly from digital files. Dimensional calibration may vary between electronic plotters and between X and Y directions on the same plotter, and paper may change size due to atmospheric conditions; therefore, scale and proportions may not be true on plots of this map.
