## **Federally Owned Landsat Data (FOLD) Program**

### **BACKGROUND**

Before the Landsat commercialization contract was signed between the Department of Commerce and the Earth Observation Satellite Company (EOSAT) on September 27, 1985, many Federal agencies purchased Landsat digital data. These data are government-owned and can be used, without restriction, by any Federal Government agency. Since the cost of purchasing copies of these data from EOSAT is quite high, considerable cost savings can be realized by obtaining a copy from an agency that purchased it before EOSAT's data-use restrictions went into effect.

To facilitate data sharing, the U.S. Geological Survey's EROS Data Center (EDC) has developed a computerized data base of information about Landsat computer-compatible tapes (CCT's) held by Federal agencies. The catalog contains listings of Federally Owned Landsat Data (FOLD) that Federal agencies are willing to duplicate for other Federal agencies at the cost of reproduction.

### **FOLD DATA BASE**

The FOLD data base lists all Landsat CCT's held by participating agencies. Duplicate CCT listings are maintained when more than one agency holds identical CCT's; this permits the user to select the most convenient site to obtain a copy. Copies of the listing are distributed by EDC to contributing agencies and other selected offices.

The data base contains, at a minimum, the following information about each CCT: scene identification number, center latitude/longitude, Landsat path/row, sensor (MSS or TM), date of acquisition, cloud cover, and data quality, and the location (holding agency) of each tape.

### **DATA BASE INQUIRIES**

Inquiries of the data base can be made by any Federal agency at no cost by contacting the Federally Owned Landsat Data Base at the EROS Data Center (605) 594-6151, or FTS 784-7151. Federal users should specifically request FOLD information; otherwise they will be directed to EOSAT for information about Landsat data available at commercial prices. Inquiries should be made by Landsat path/row identifier or specific image ID. Data held by EDC can be ordered directly; copies of other data must be requested from the holding agency.

## **OBTAINING DATA**

Federal users wishing to purchase a copy of a FOLD CCT held in the EDC archive will be charged for the cost of reproduction only (approximately \$80) on a per-tape basis. Other participating agencies are urged to price tape copies on a similar per-tape basis. EDC and other holding agencies will make their best effort to provide high-quality copies. They cannot, however, be responsible for data quality.

## **CONTRIBUTING INFORMATION TO THE FOLD DATA BASE**

Agencies are encouraged to provide information to EDC about pre-EOSAT Landsat data they own and are willing to share via the FOLD data base system. The following information is needed to develop a complete data base listing: complete 13-character scene ID (for example, Y8532100561X0), tape format (BIL or BSQ), tape density (BPI), Landsat sensor (MSS or TM), whether the data is geometrically corrected or uncorrected, and quad number (for TM data).

## **TRANSFER OF DATA TO THE EDC FOLD ARCHIVE**

If an agency wants to make its data available to other agencies but does not want to handle data requests, it may donate data to the EDC archive for permanent storage. EDC reserves the right to inspect donated CCT's and reject any that do not meet quality and machine-readability criteria. Specific terms and conditions of acceptance and data transfer will be formalized in a written agreement with the contributing agency. All CCT's sent to EDC for archiving become the property of USGS/EDC. Duplicate CCT's will not be archived. Contributors may choose to keep copies of donated CCT's for their own use, or they may order copies from EDC at the established cost of reproduction.

To contribute information or CCT's to the FOLD data base, please contact:

\*Landsat computer compatible tapes (CCT's) purchased prior to the signing of the commercialization contract on September 27, 1985.

- Current on-line listings: 6,496 scenes (4,564 MSS/RBV scenes and 1,932 TM scenes)
- Landsat 1-3 (MSS/RBV) = 4,361 scenes, Landsat 4-5 (MSS) = 203 scenes, Landsat 4-5 (TM) = 1,848 scenes, TM Scrounge = 84 scenes
- Through December 1987, only indexing information has been contributed to EDC, no CCT's contributed to EDC archive.

4-04-88

**FEDERALLY OWNED LANDSAT DATA BASE (FOLD)\***

The following is a directory of contributors to the Federally Owned Landsat Data Base (FOLD). The "Tape Location" field (refer to the attached computer printout) is designed to identify the storage location of the FOLD computer compatible tapes (CCT's). The first two or three characters of the Tape Location have been uniquely coded to identify the data source. Cross reference these characters to the storage location codes below. To obtain CCT copies, contact the appropriate agency.
