##### GEOGRAPHIC NAMES INFORMATION SYSTEM (GNIS)

The Geographic Names Information System currently consists of approximately two million name entries with information about the feature name and category and its geographic location by coordinates, county, and USGS topographic maps. The name file was developed from published 7.5-minute topographic maps. In areas where 7.5-minute maps have not been published, 15-minute maps or 1:250,000-scale maps provided basic name data.

Alphabetical listings are available for each State, territory and outlying area. These preliminary gazetteers list only those names found on the topographic maps of the U.S. Geological Survey. Two topical listings are available: a national listing of populated places and an abridged version of all States, territories and outlying areas, which contains about 40,000 populated places, other administrative places, and major physical features. Many of these files are also available in microfiche.

Other computer listings, specialized searches, and computer tapes may also be purchased.

GNIS, developed by Branch of Geographic Names, Office of Geographic and Cartographic Research, National Mapping Division, is the basis for Professional Paper 1200. The first chapter, P-1200-NJ (New Jersey) was published in 1982 (revised 1983). Each State, territory, and outlying area will be published as a separate chapter after further research and compilation. All other Federal sources, most State sources and other pertinent materials as well as historical documents are researched to complete the

requirements for the National Names Depository. Additional published gazetteers include Delaware, Kansas and Arizona; and Oregon, South Dakota, North Dakota, Indiana, Iowa and Florida are complete and in various stages of printing and editing. State files in compilation include Alabama, Mississippi, Massachusetts, Utah, Pennsylvania and Rhode Island. The interim materials described may meet the needs of a wide variety of potential users until all chapters have been published.

#### WATER-RESOURCES INVESTIGATIONS REPORTS

"Water-Resources Investigations Report" (WRI) in this listing is applied to reports that are of an interpretative nature made available to the public outside the formal USGS publications series. WRI's are not reproduced and distributed in quantity as are formal USGS publications, but are available for public inspection at the indicated depositories.

The following WRI reports are available from the U.S. Geological Survey, Books and Open-File Reports Section, Federal Center, Denver, CO 80225 (telephone 303-236-7476). For specific ordering instructions, please refer to "Reports Available Only Through the Books and Open-File Reports Section" under "Open-File Reports." When ordering, use the WRI number preceding each item, and do not mix orders for WRI reports and open-file reports with other Geological Survey products.

#### OPEN-FILE REPORTS

Open-file reports include unpublished manuscript reports, maps, and other material and are made available for public consultation and use. They are a nonpermanent form of publication that may be cited in other publications as sources of information. They are not considered to be a part of the formal literature.

Most open-file reports are available from the U.S. Geological Survey, Books and Open-File Reports Section, Federal Center, Box 25425, Denver, CO 80225 (telephone: 303-236-7476). The following listing of open-file reports is subdivided to show which reports are available from the Denver facility and which ones are not. Specific instructions for ordering and availability of reports are given under each sublisting.

Open-file reports are also available for reference only, **not for purchase**, at additional locations indicated in each open-file listing.

#### Reports Available Only Through the Books and Open-File Reports Section

*Microfiche and (or) black and white paper copies of most reports may be obtained from the U.S. Geological Survey, Books and Open-File Reports Section, Federal Center, Box 25425, Denver, CO 80225 (telephone: 303-236-7476). When ordering, please use the open-file number and full title. Do not mix orders for open-file reports with orders for other Geological Survey products. Prices for duplicate slides and color photographs can be obtained on request. Check or money order, in exact amount for open-file reports ordered, should be payable to Department of the Interior—USGS. Prepayment is required. No discount is applicable. For transmittal outside the U.S.A. (except Canada and Mexico), a surcharge of 25 percent of the bill should be included to cover surface transportation.*

A microfiche copy of a computer listing of reports showing report number and paper copy and microfiche prices is available from the Books and Open-File Reports Section. The listing does not show author or title of the reports. This "Open File Report Price Listing" is updated bimonthly. Contact the Books and Open-File Reports Section for information concerning the price of the listing.
