DEPARTMENT OF THE INTERIOR
UNITED STATES GEOLOGICAL SURVEY

INTRODUCTION

This compilation is a listing of the serial publications cited in the following publications of the United States Geological Survey: Geophysical Abstracts, Abstracts of North American Geology, Bibliography of North American Geology, and Bibliography of Hydrology of the United States. A supplement of publications added since the main list was compiled begins on page 83. New journals cited in Geophysical Abstracts are listed in each monthly issue. Serial publications cited in each annual bibliography are listed in that volume.

Symposiums, guidebooks, conferences, congresses, and the like are not included in this listing as complete publication information is included in the citation.

Japanese and Chinese titles are given in translation and Cyrillic titles have been transliterated by the system used by the United States Board on Geographic Names.

Abbreviations of journal titles are those recommended in *Suggestions to authors of the reports of the United States Geological Survey*, 5th edition, 1958. The organization name is the identifying item of each publication in keeping with library procedures and also to place serials of one organization together. As an example, both the *American Ceramic Society Bulletin* and the *Journal of the American Ceramic Society* are listed under the organization and are so cited in the bibliographies and abstract journals.
