KEEP UP TO DATE

Between the time you ordered this report—which is only one of the hundreds of thousands in the NTIS information collection available to you—and the time you are reading this message, several *new* reports relevant to your interests probably have entered the collection.

Subscribe to the **Weekly Government Abstracts** series that will bring you summaries of new reports *as soon as they are received by NTIS* from the originators of the research. The WGA's are an NTIS weekly newsletter service covering the most recent research findings in 25 areas of industrial, technological, and sociological interest—invaluable information for executives and professionals who must keep up to date.

The executive and professional information service provided by NTIS in the **Weekly Government Abstracts** newsletters will give you thorough and comprehensive coverage of government-conducted or sponsored re-

search activities. And you'll get this important information within two weeks of the time it's released by originating agencies.

WGA newsletters are computer produced and electronically photocomposed to slash the time gap between the release of a report and its availability. You can learn about technical innovations immediately—and use them in the most meaningful and productive ways possible for your organization. Please request NTIS-PR-205/PCW for more information.

The weekly newsletter series will keep you current. But *learn what you have missed in the past* by ordering a computer **NTISearch** of all the research reports in your area of interest, dating as far back as 1964, if you wish. Please request NTIS-PR-186/PCN for more information.

Keep Up To Date With SRIM

SRIM (Selected Research in Microfiche) provides you with regular, automatic distribution of the complete texts of NTIS research reports *only* in the subject areas you select. SRIM covers almost all Government research reports by subject area and/or the originating Federal or local government agency. You may subscribe by any category or subcategory of our WGA (**Weekly Government Abstracts**) or **Government Reports Announcements and Index** categories, or to the reports issued by a particular agency such as the Department of Defense, Federal Energy Administration, or Environmental Protection Agency. Other options that will give you greater selectivity are available on request.

The cost of SRIM service is only 45¢ domestic (60¢ foreign) for each complete

microfiched report. Your SRIM service begins as soon as your order is received and processed and you will receive biweekly shipments thereafter. If you wish, your service will be backdated to furnish you microfiche of reports issued earlier.

Because of contractual arrangements with several Special Technology Groups, not all NTIS reports are distributed in the SRIM program. You will receive a notice in your microfiche shipments identifying the exceptionally priced reports not available through SRIM.

A deposit account with NTIS is required before this service can be initiated. If you have specific questions concerning this service, please call (703) 451-1558, or write NTIS, attention SRIM Product Manager.

Author Index to Published ERTS-1 Reports
by
Timothy C. Bidwell and Cheryl A. Mitchell 1/

This index has been compiled to assist the reader in locating and obtaining reports on the 334 scientific experiments conducted under the National Aeronautics and Space Administration (NASA) Earth Resources Technology Satellite-1 (ERTS-1) (renamed Landsat) program. Each NASA-designated experimenter was required to submit written reports on his investigation: these were designated type 1, type 2, and type 3 reports. Type 1 reports were periodic (monthly or bimonthly) progress summaries; type 2 were comprehensive scientific and technical reports; and type 3 were final reports. Investigators were also encouraged to present their more significant findings in professional or technical journals and proceedings of symposia.

"Symposium" after an entry refers to articles published in "Symposium on Significant Results Obtained from the Earth Resources Technology Satellite-1" (NASA Special Paper-327, 1973; listed in index as March 1973, and "Third Earth Resources Technology Satellite-1 Symposium" (NASA Special Paper-351, 1974; listed in index as December 1973, the date of the symposium), and not to symposia in general.

Articles in professional and technical journals are not available through NTIS and, hence, are not included in this index, unless they were submitted originally as type 1, 2, or final reports.

This index lists the reports that have been published between April 1972 and September 1975. Each of the documents can be purchased from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161. Microfiche copies are presently \$2.25 each while paper copy prices vary according to the number of pages in the document.

The format for this document lists each author's name, address, and title of the experiment. Below that information each entry represents a separate document in the series and contains the following information arranged by N number.

<u>E-72-10001</u>	<u>N72-15001</u>	<u>May 1972</u>	<u>36 Pages</u>	<u>Type 2</u>
NASA Facility Accession Number*	NASA Accession Number and NTIS Order Number	Date of Publication	Number of Pages	Type of Report**

* Some documents listed may not have this number.

** A blank space in this section indicates a type 1 report.
