

PREFACE

This volume of the annual hydrologic data report of South Carolina is one of a series of annual reports that document hydrologic data gathered from the U. S. Geological Survey's surface-water and ground-water data-collection networks in each State, Puerto Rico, and the Trust Territories. These records of streamflow, ground-water levels, and quality of water provide the hydrologic information needed by State, local, and Federal agencies, and the private sector for developing and managing our Nation's land and water resources. Hydrologic data for South Carolina are contained in one volume.

This report is the culmination of a concerted effort by dedicated personnel of the U. S. Geological Survey who collected, compiled, analyzed, verified, and organized the data, and who typed, edited, and assembled the report. In addition to the authors, who had primary responsibility for assuring that the information contained herein is accurate, complete, and adheres to Geological Survey policy and established guidelines, the following individuals contributed significantly to the collection, processing, and tabulation of the data:

James K. Acker	Brian L. Daniels	Celeste Journey	Dale F. Skipper
Andral W. Caldwell	Timothy R. Dunleavy	James A. Kiser	Brian F. Wahl
Bruce Campbell	John W. Erbland	K. Brady Long	Carlton Wood
Bill Church	Greg Gilmore	Wes A. Murray	
Keith A. Cobb	Jane M. Hale	William P. Roberts	
Paul A. Conrads	J. Michael Hall	Patricia M. Sadler	

Sarah W. Ellisor and Tim Lanier typed, edited, and assembled the report. This report was prepared in cooperation with the State of South Carolina and with other agencies under the general supervision of Eric W. Strom, Director South Carolina Water Science Center.
