TO THE USERS OF GEOLOGICAL SURVEY HYDROLOGIC DATA:

Enclosed is a copy of the report entitled "Maps showing ground-water conditions in the San Simon area, Cochise and Graham Counties, Arizona, and in Hidalgo County, New Mexico--1975," by R. P. Wilson and N. D. White. The report was prepared by the U.S. Geological Survey in cooperation with the Arizona Water Commission and has been published as U.S. Geological Survey Water-Resources Investigations 76-89. Computer printouts of the hydrologic data on which the maps are based are available for consultation at the Arizona Water Commission, 222 North Central Avenue, Suite 800, Phoenix, and the U.S. Geological Survey offices in: Federal Building, 301 West Congress Street, Tucson, and Valley Center, Suite 1880, Phoenix. Material from which copies can be made at private expense is available at the Tucson and Phoenix offices of the U.S. Geological Survey.

The maps for the San Simon area are part of a series that eventually will cover the entire State. The maps show depth to water, well depth and altitude of the water level, 1975; pumpage, 1915-74; and change in water level for 1964-75, hydrographs of the water level in selected wells, specific conductance, and fluoride concentration.

Sincerely yours,

*H. M. Babcock*

H. M. Babcock
