

GEOLOGIC SECTIONS

EXPLANATION

- OUTWASH DEPOSITS**—Dark gray areas have 20 or more feet of saturated sand and gravel; light gray areas have less than 20 feet of saturated sand and gravel
- BEDROCK AND GLACIAL TILL**—Not differentiated on geologic map or geologic sections
- CONTACT**
- TEST HOLE**—"C" denotes chemical sample
- AQUIFER-TEST WELL**—Number denotes transmissivity, in feet squared per day
- WATER-ANALYSIS PATTERN**—Pattern is based on water analyses from indicated observation wells. Concentrations, in milliequivalents per liter, are plotted for calcium (Ca), sodium (Na), magnesium (Mg), bicarbonate (HCO₃), chloride (Cl), and sulfate (SO₄). The larger the area of the pattern the greater the dissolved-solids concentration

GEOLOGIC SECTIONS

Test holes are shown as vertical lines with location numbers

VERTICAL SCALE GREATLY EXAGGERATED

ALTITUDE, IN FEET ABOVE NATIONAL GEODETIC VERTICAL DATUM OF 1929
