DEPARTMENT OF THE INTERIOR
UNITED STATES GEOLOGICAL SURVEY

Prepared in cooperation with the
NEVADA BUREAU OF MINES AND GEOLOGY

WATER RESOURCES INVESTIGATIONS REPORT 83-4119-B
(SHEET 2 OF 2)

MAP SHOWING DEPTH TO GROUND WATER

SCALE 1:1 000 000

25 0 25 50 75 100 MILES
25 0 25 50 75 100 KILOMETERS

Base from U.S. Geological Survey
State base map, 1965

MAP SHOWING STUDY AREA IN THE BASIN AND RANGE PROVINCE AND AREA OF THIS REPORT

EXPLANATION

6500 GROUND-WATER-LEVEL CONTOUR.--Shows approximate altitude of the ground-water level in basin fill. Dashed where inferred. Depressions shown by hachures inside closed contours. Supplemental contours shown by short-dashed line. Contour interval, in feet, is variable. National Geodetic Vertical Datum of 1929

SPRING.--Upper number is water temperature, in degrees Celsius. Lower number is discharge, in gallons per minute. Dash (-) indicates unknown temperature or discharge. Maximum and minimum temperatures are shown where more than one measurement has been made in a spring (26/450). Springs known to discharge less than 10 gallons per minute are not shown. Groups of springs are shown by a single symbol with a number in parentheses indicating the number of springs in the group ((3) 26/450) and with the average temperature and cumulative discharge for the group shown in the upper and lower positions, respectively

2400 PRE-TERTIARY GROUND-WATER-LEVEL CONTOUR.--Shows approximate altitude of the ground-water level in pre-Tertiary aquifers. Contour interval, in feet, is variable. National Geodetic Vertical Datum of 1929

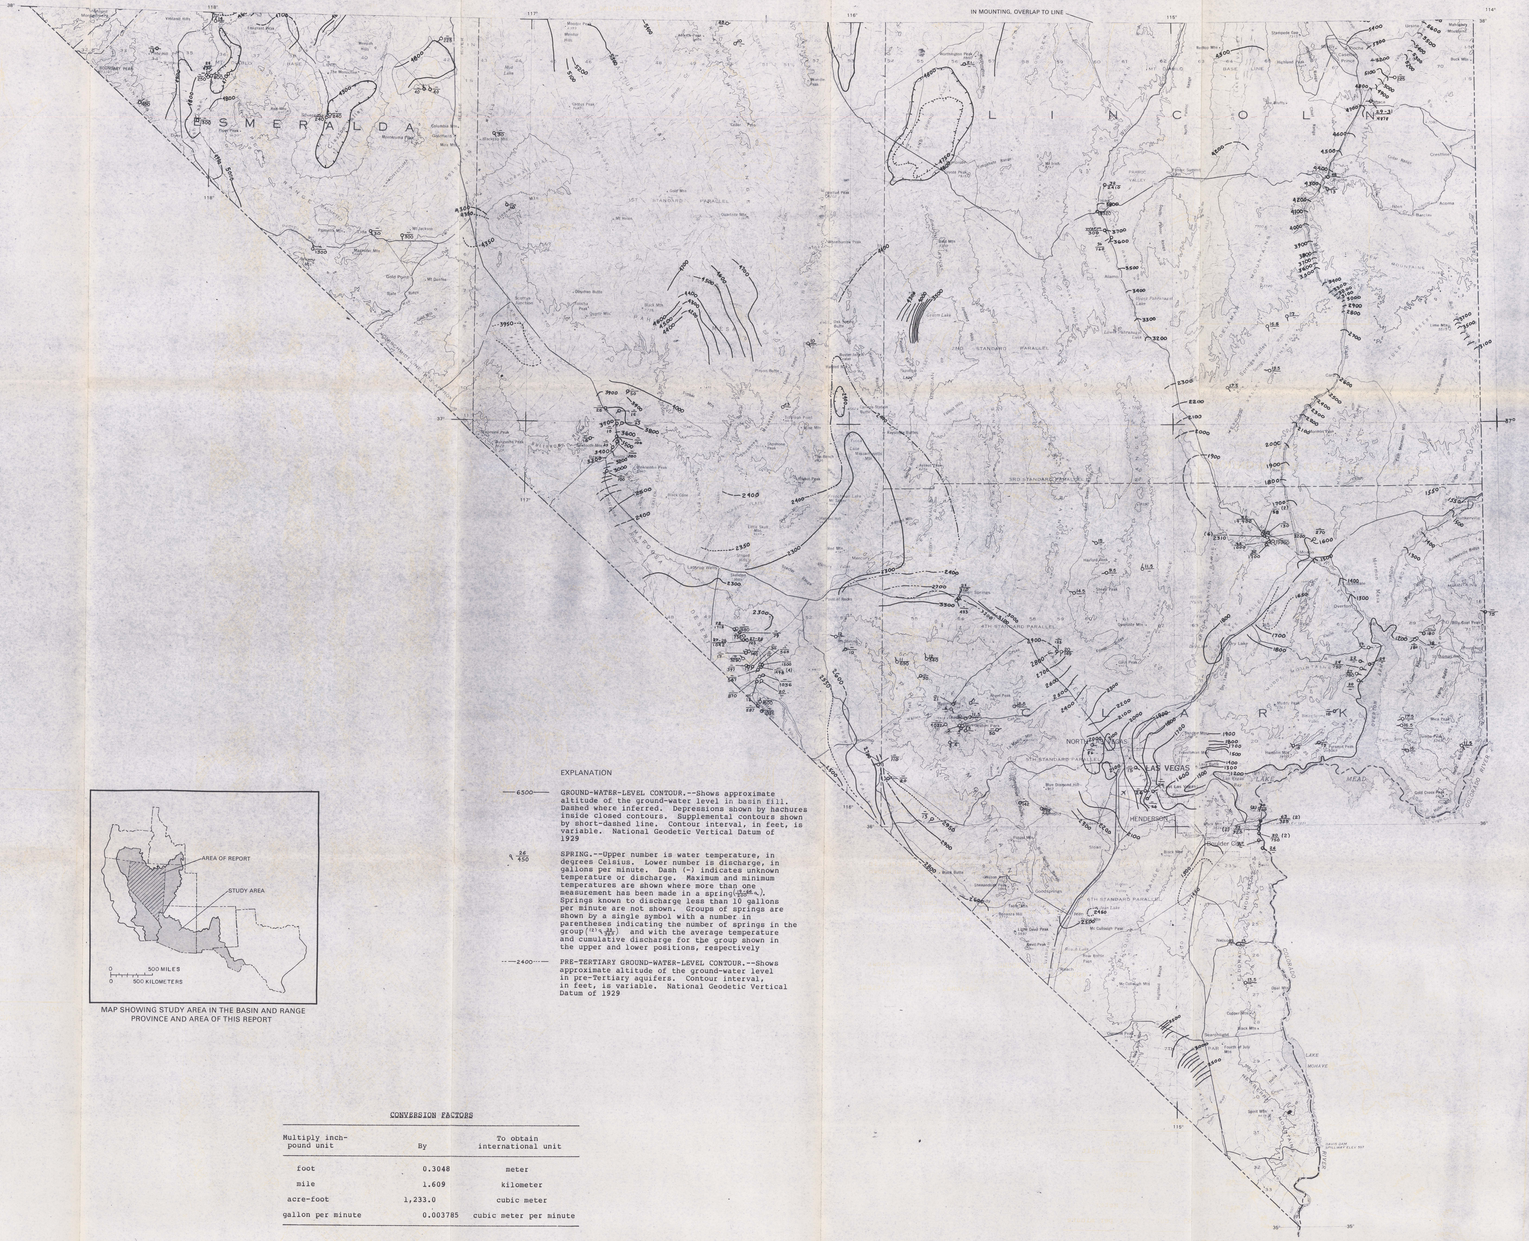

CONVERSION FACTORS

Multiply inch-pound unit	By	To obtain international unit
foot	0.3048	meter
mile	1.609	kilometer
acre-foot	1,233.0	cubic meter
gallon per minute	0.003785	cubic meter per minute
