

- EXPLANATION
- 2000 — POTENTIOMETRIC CONTOUR FOR THE UPPER GROUND-WATER SYSTEM—Shows altitude at which water level would have stood in tightly cased wells, 1983. Contour interval, in meters above sea level, is variable
 - 2791 WELL—Number is altitude of water level, in meters above sea level
 - 2493 SPRING—Number is spring altitude, in meters above sea level
 - ➔ GENERAL DIRECTION OF GROUND-WATER FLOW
 - BOUNDARY OF SAN MIGUEL RIVER BASIN

Base from U.S. Geological Survey 1:250 000 quadrangles:
 Cortez 1956-69, Durango 1945, Moab 1956-69, Montrose 1977.

MAP SHOWING GENERALIZED HYDROLOGY OF THE SAN MIGUEL RIVER BASIN, SOUTHWESTERN COLORADO
