

RECORDS OF WELLS

EXPLANATION

APPROXIMATE BOUNDARY OF AREAS UNDERLAIN BY PERCHED-WATER ZONES

POTENTIOMETRIC-SURFACE CONTOUR--Shows altitude of water surface, March-April 1984. Dashed where approximately located. Contour interval, in feet, is variable. Datum is sea level

PERCHED-WATER TABLE CONTOUR--Shows altitude of perched-water table, March-April 1984. Dashed where approximately located. Contour interval, in feet, is variable. Datum is sea level

GENERALIZED DIRECTION OF GROUND-WATER MOVEMENT

WELL AND ABBREVIATED NUMBER--Shown in records of wells

IRRIGATION WELL

FAULT--Dashed where approximately located (Crosthwaite, 1969, and Rember and Bennett, 1979)

Study area boundary

WELL-NUMBERING SYSTEM

The well-numbering system used by the U.S. Geological Survey in Idaho indicates the location of wells within the official rectangular subdivision of the public lands, with reference to the Boise base line and meridian. The first two segments of the number designate the township and range. The third segment gives the section number, followed by three letters and a numeral, which indicate the 4 section (160-acre tract), 4-4 section (40-acre tract), 4-4-4 section (10-acre tract), and serial number of the well within the tract. Quarter sections are lettered A, B, C, and D in counterclockwise order from the northeast quarter of each section. Within quarter sections, 40-acre and 10-acre tracts are lettered in the same manner. Well 128-22E-16CCCI is in the SW1/4SW1/4 sec. 16, T. 12 S., R. 22 E., and was the first well inventoried in that tract.

[Well Finish--O, open end; P, perforated; X, open hole; [Well--A, alluvium; B, basalt; L, limestone; R, rhyolite]

Well No.		Section	Altitude above surface (feet)	Reported well depth (feet)	Casing	Water level	Altitude of well surface (feet)	Driller's name
Township	Range				Diameter (inches)	Feet below surface
