

EXPLANATION

APPROXIMATE BOUNDARY OF AREA OF GREATEST POTENTIAL FOR LIGNITE MINING  
 SURFACE-WATER DIVIDE  
  TRACE OF SECTION  
 TEST HOLE OR WELL WITH LOG—Numbers indicate top and bottom of lignite intervals above a depth of 150 feet and 5 feet or greater in thickness

Figure 2.—Approximate location of areas of greatest potential for lignite mining and intervals of lignite beds above a depth of 150 feet.
