Source of Data

There are no data on the source of the data used in this report.

Location of Wells and Test Holes

The location of wells and test holes is shown on the map. The wells are labeled with their names and locations, and the test holes are identified by their type and purpose.

Introduction

The introduction of the report explains the scope and objectives of the study. It outlines the methods used in the investigation and the significance of the findings.

Purpose and Scope

The purpose of the report is to provide a comprehensive analysis of the hydrogeology of the Fort Drum area. The scope includes the study of groundwater resources, water quality, and the potential for water supply and irrigation.

Explanation

The explanation section provides a detailed description of the hydrogeological features of the study area. It includes information on water tables, aquifers, and the distribution of groundwater resources.

Selected References

The selected references list the sources used in the report, including scientific papers, government documents, and other relevant works.
