EXPLANATION

- 10 - POTENTIOMETRIC CONTOUR:潜水位比
- 0 - OBSERVATION WELL

NOTE: The potentiometric contours are generalized to portray synoptically the head in a dynamic hydrologic system taking due account of the variations in hydrologic conditions such as differing depths of wells, nonuniform measurements of water levels, variable effects of pumping, and changing climatic influence. The potentiometric contours may not conform exactly with individual measurements of water level.

Location of Suwannee River Water Management District

POTENTIOMETRIC SURFACE OF THE FLORIDAN AQUIFER SYSTEM IN THE SUWANNEE RIVER WATER MANAGEMENT DISTRICT, FLORIDA, MAY 1985
