

Figure A.—Mean annual precipitation, 1956-1977, and location and reference numbers of meteorological stations.

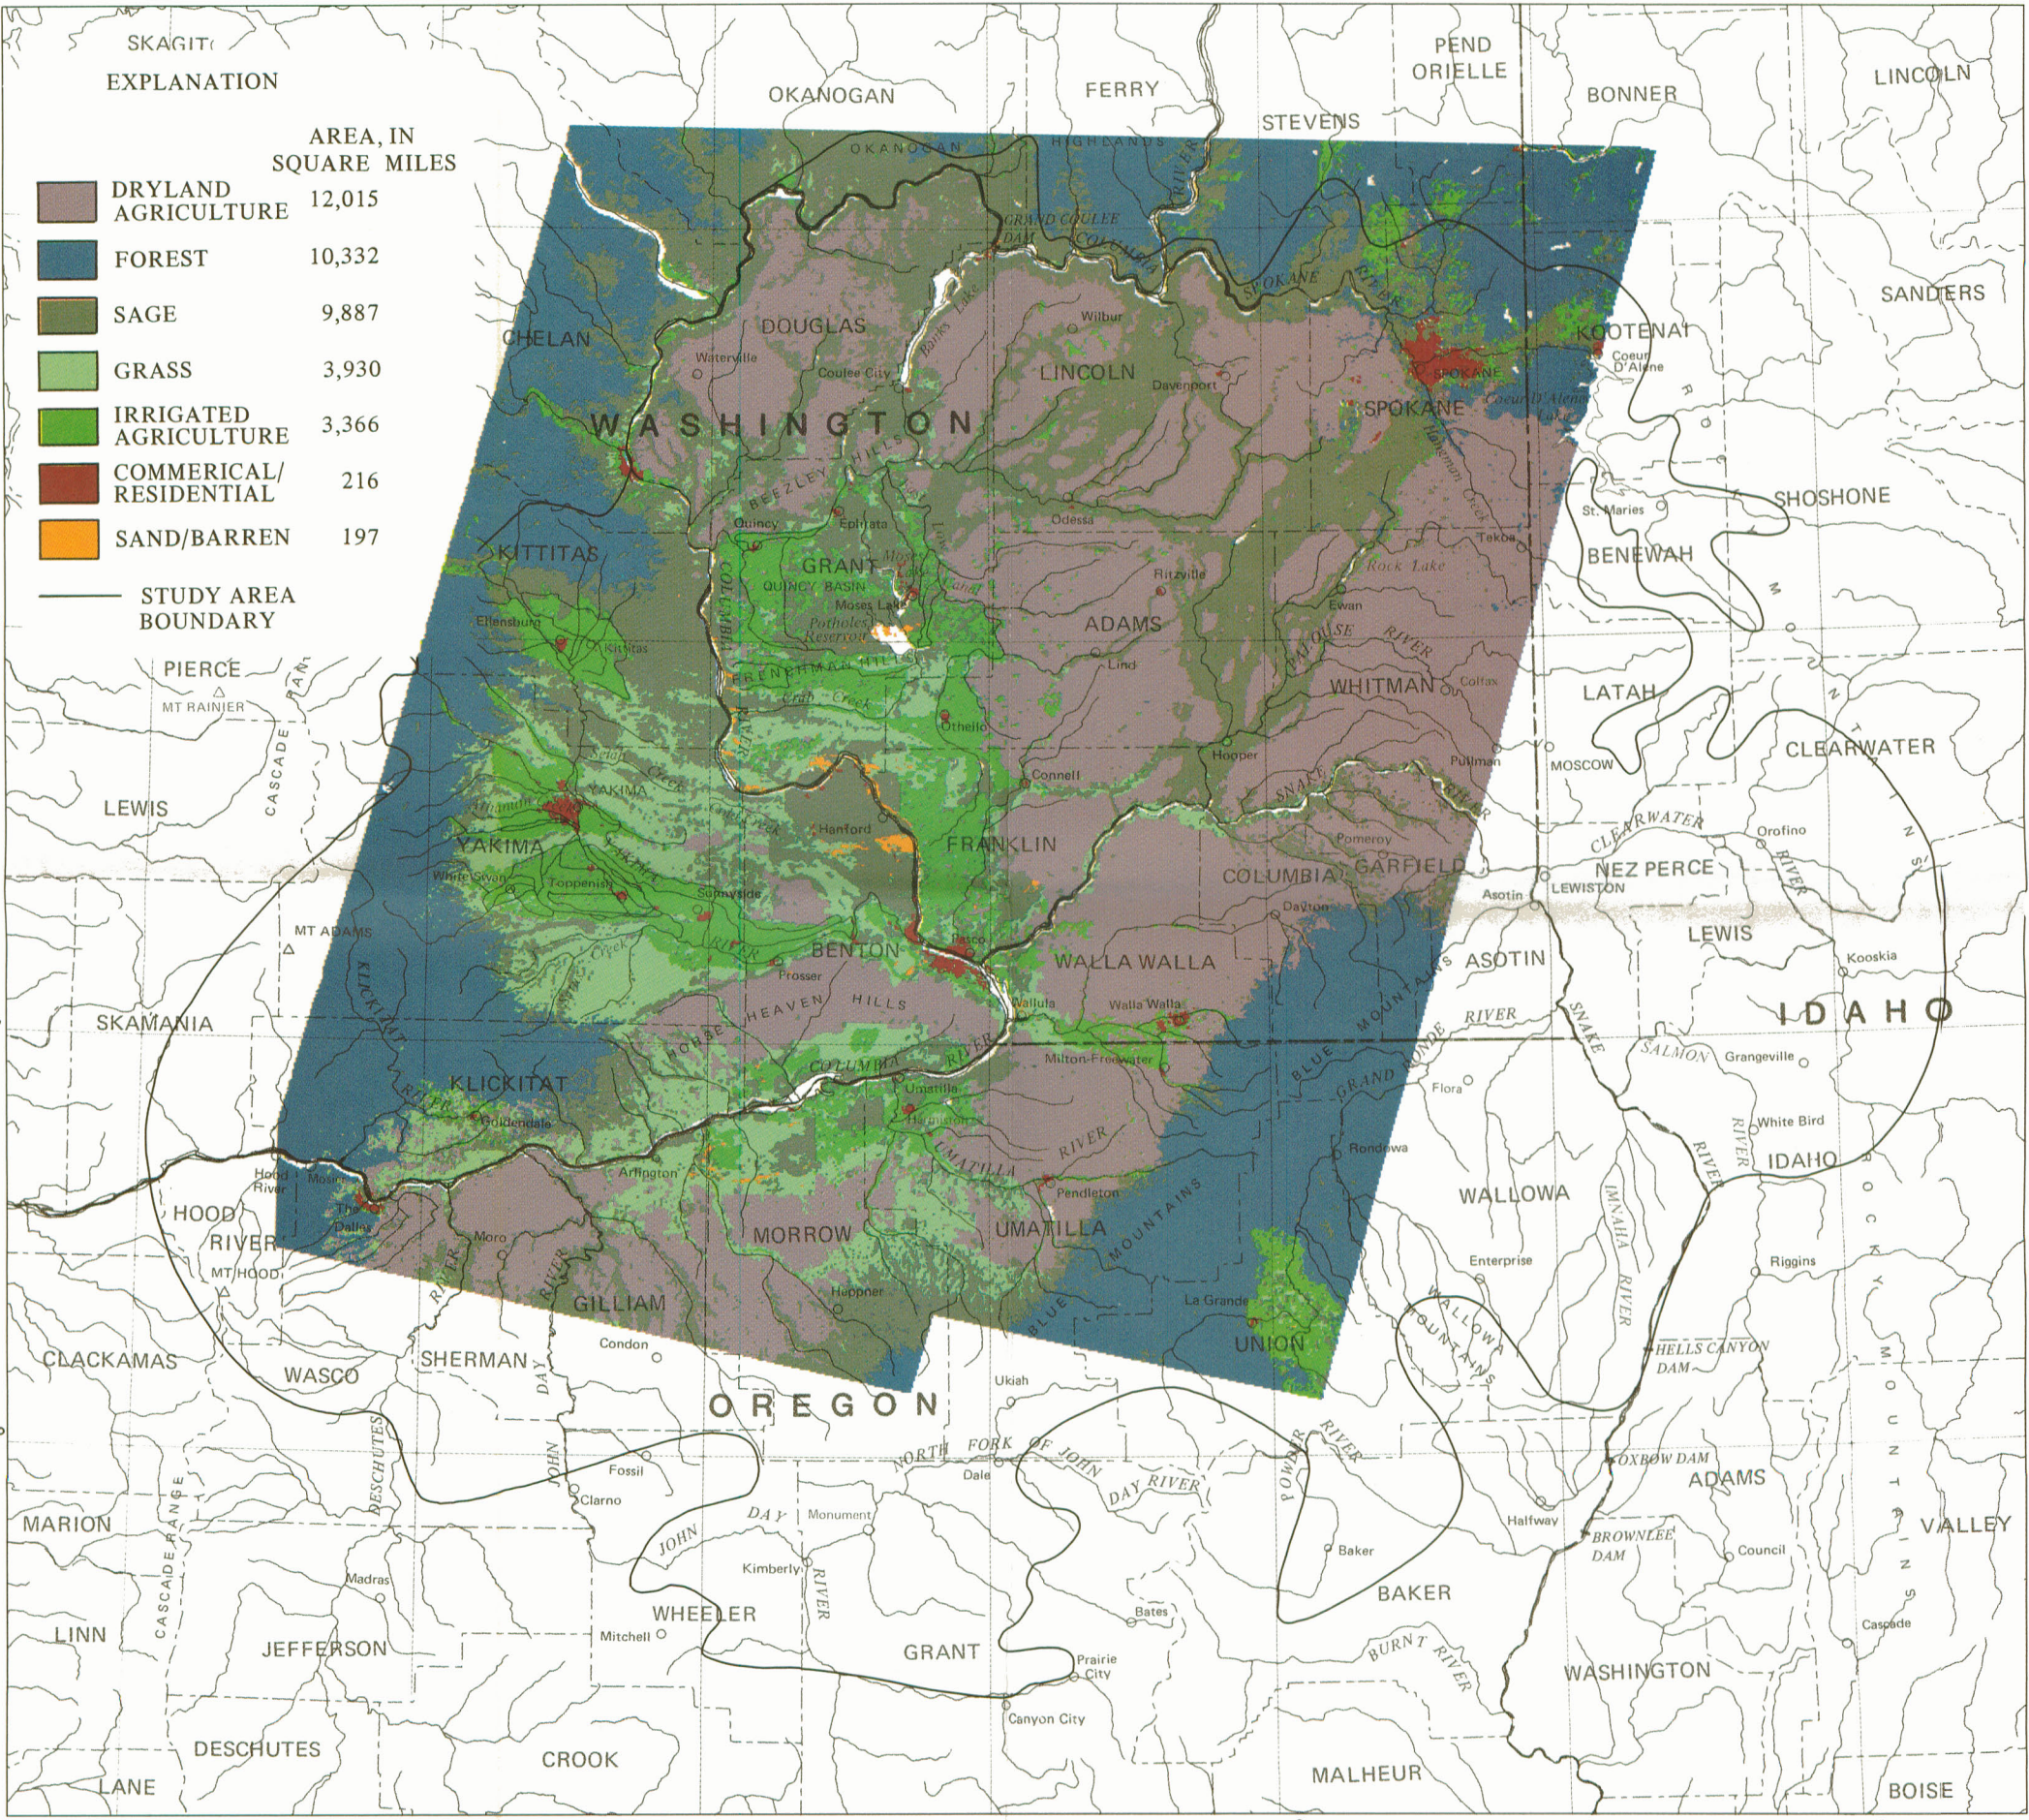

Figure C.—Land-use classification for the Columbia Plateau for 1975 (after Wukelic and others, 1981).

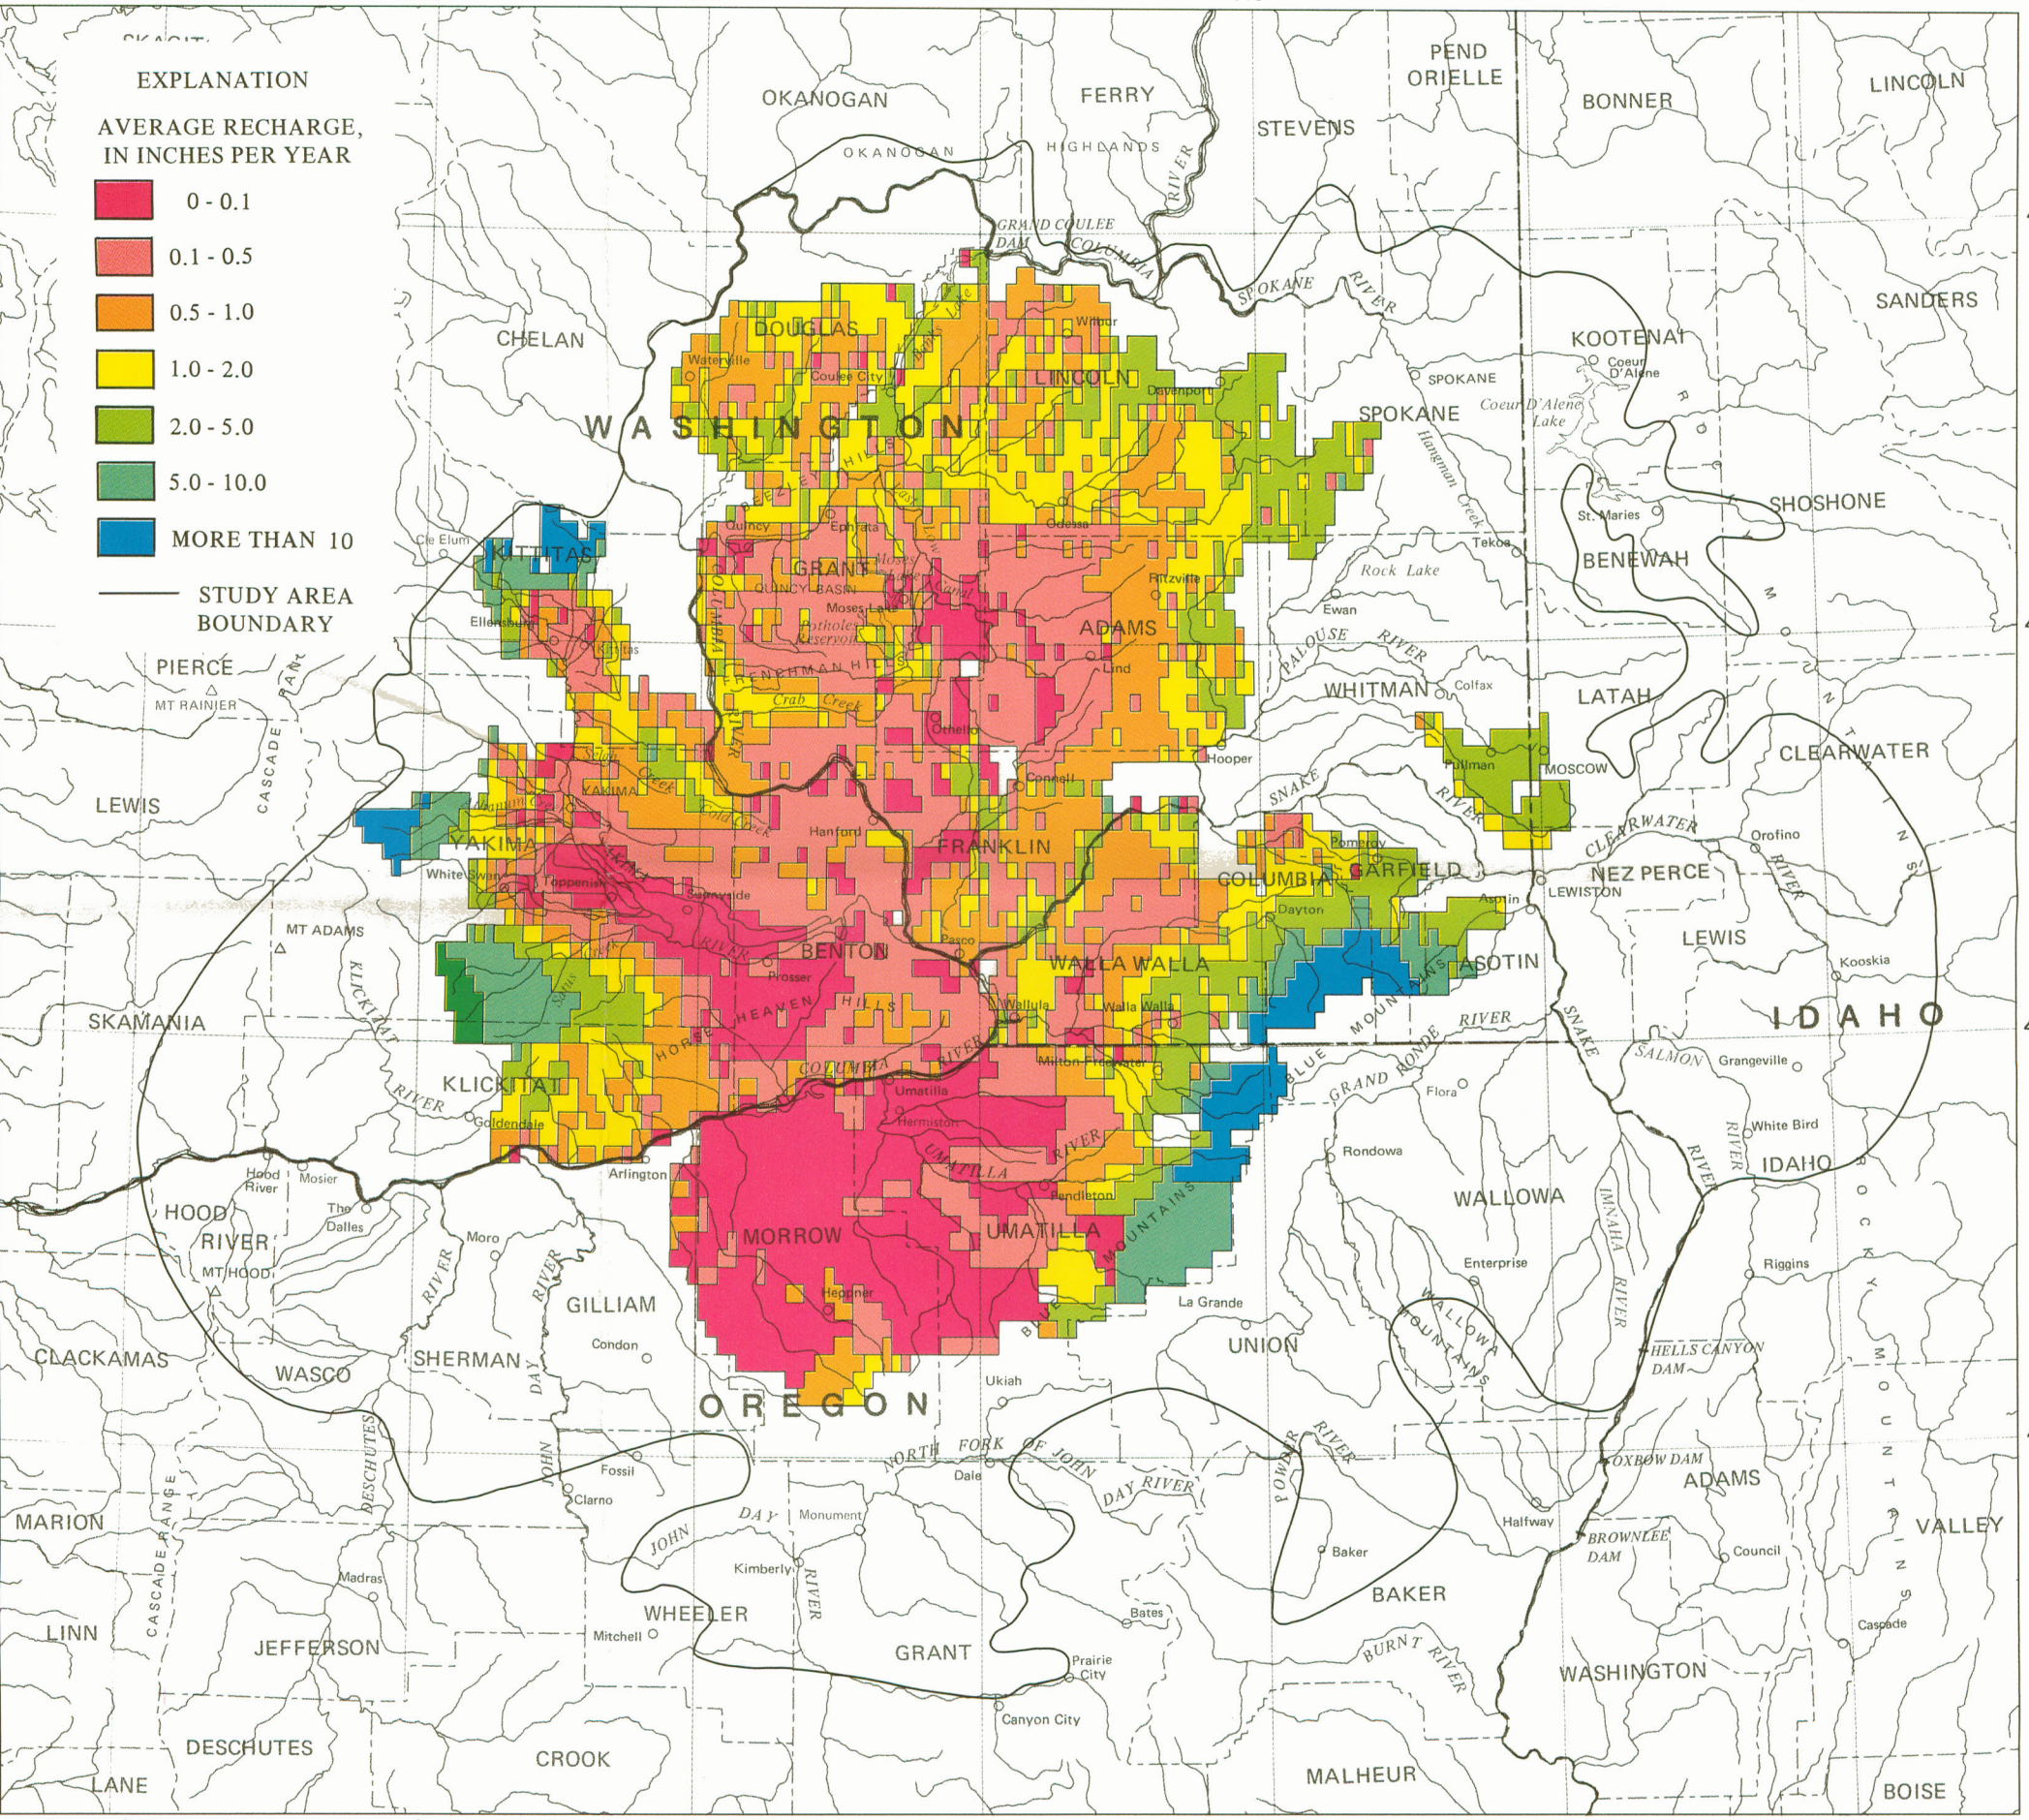

Figure E.—Estimated recharge distribution for predevelopment land-use conditions for the modeled zones imposed on the ground-water model grid system.

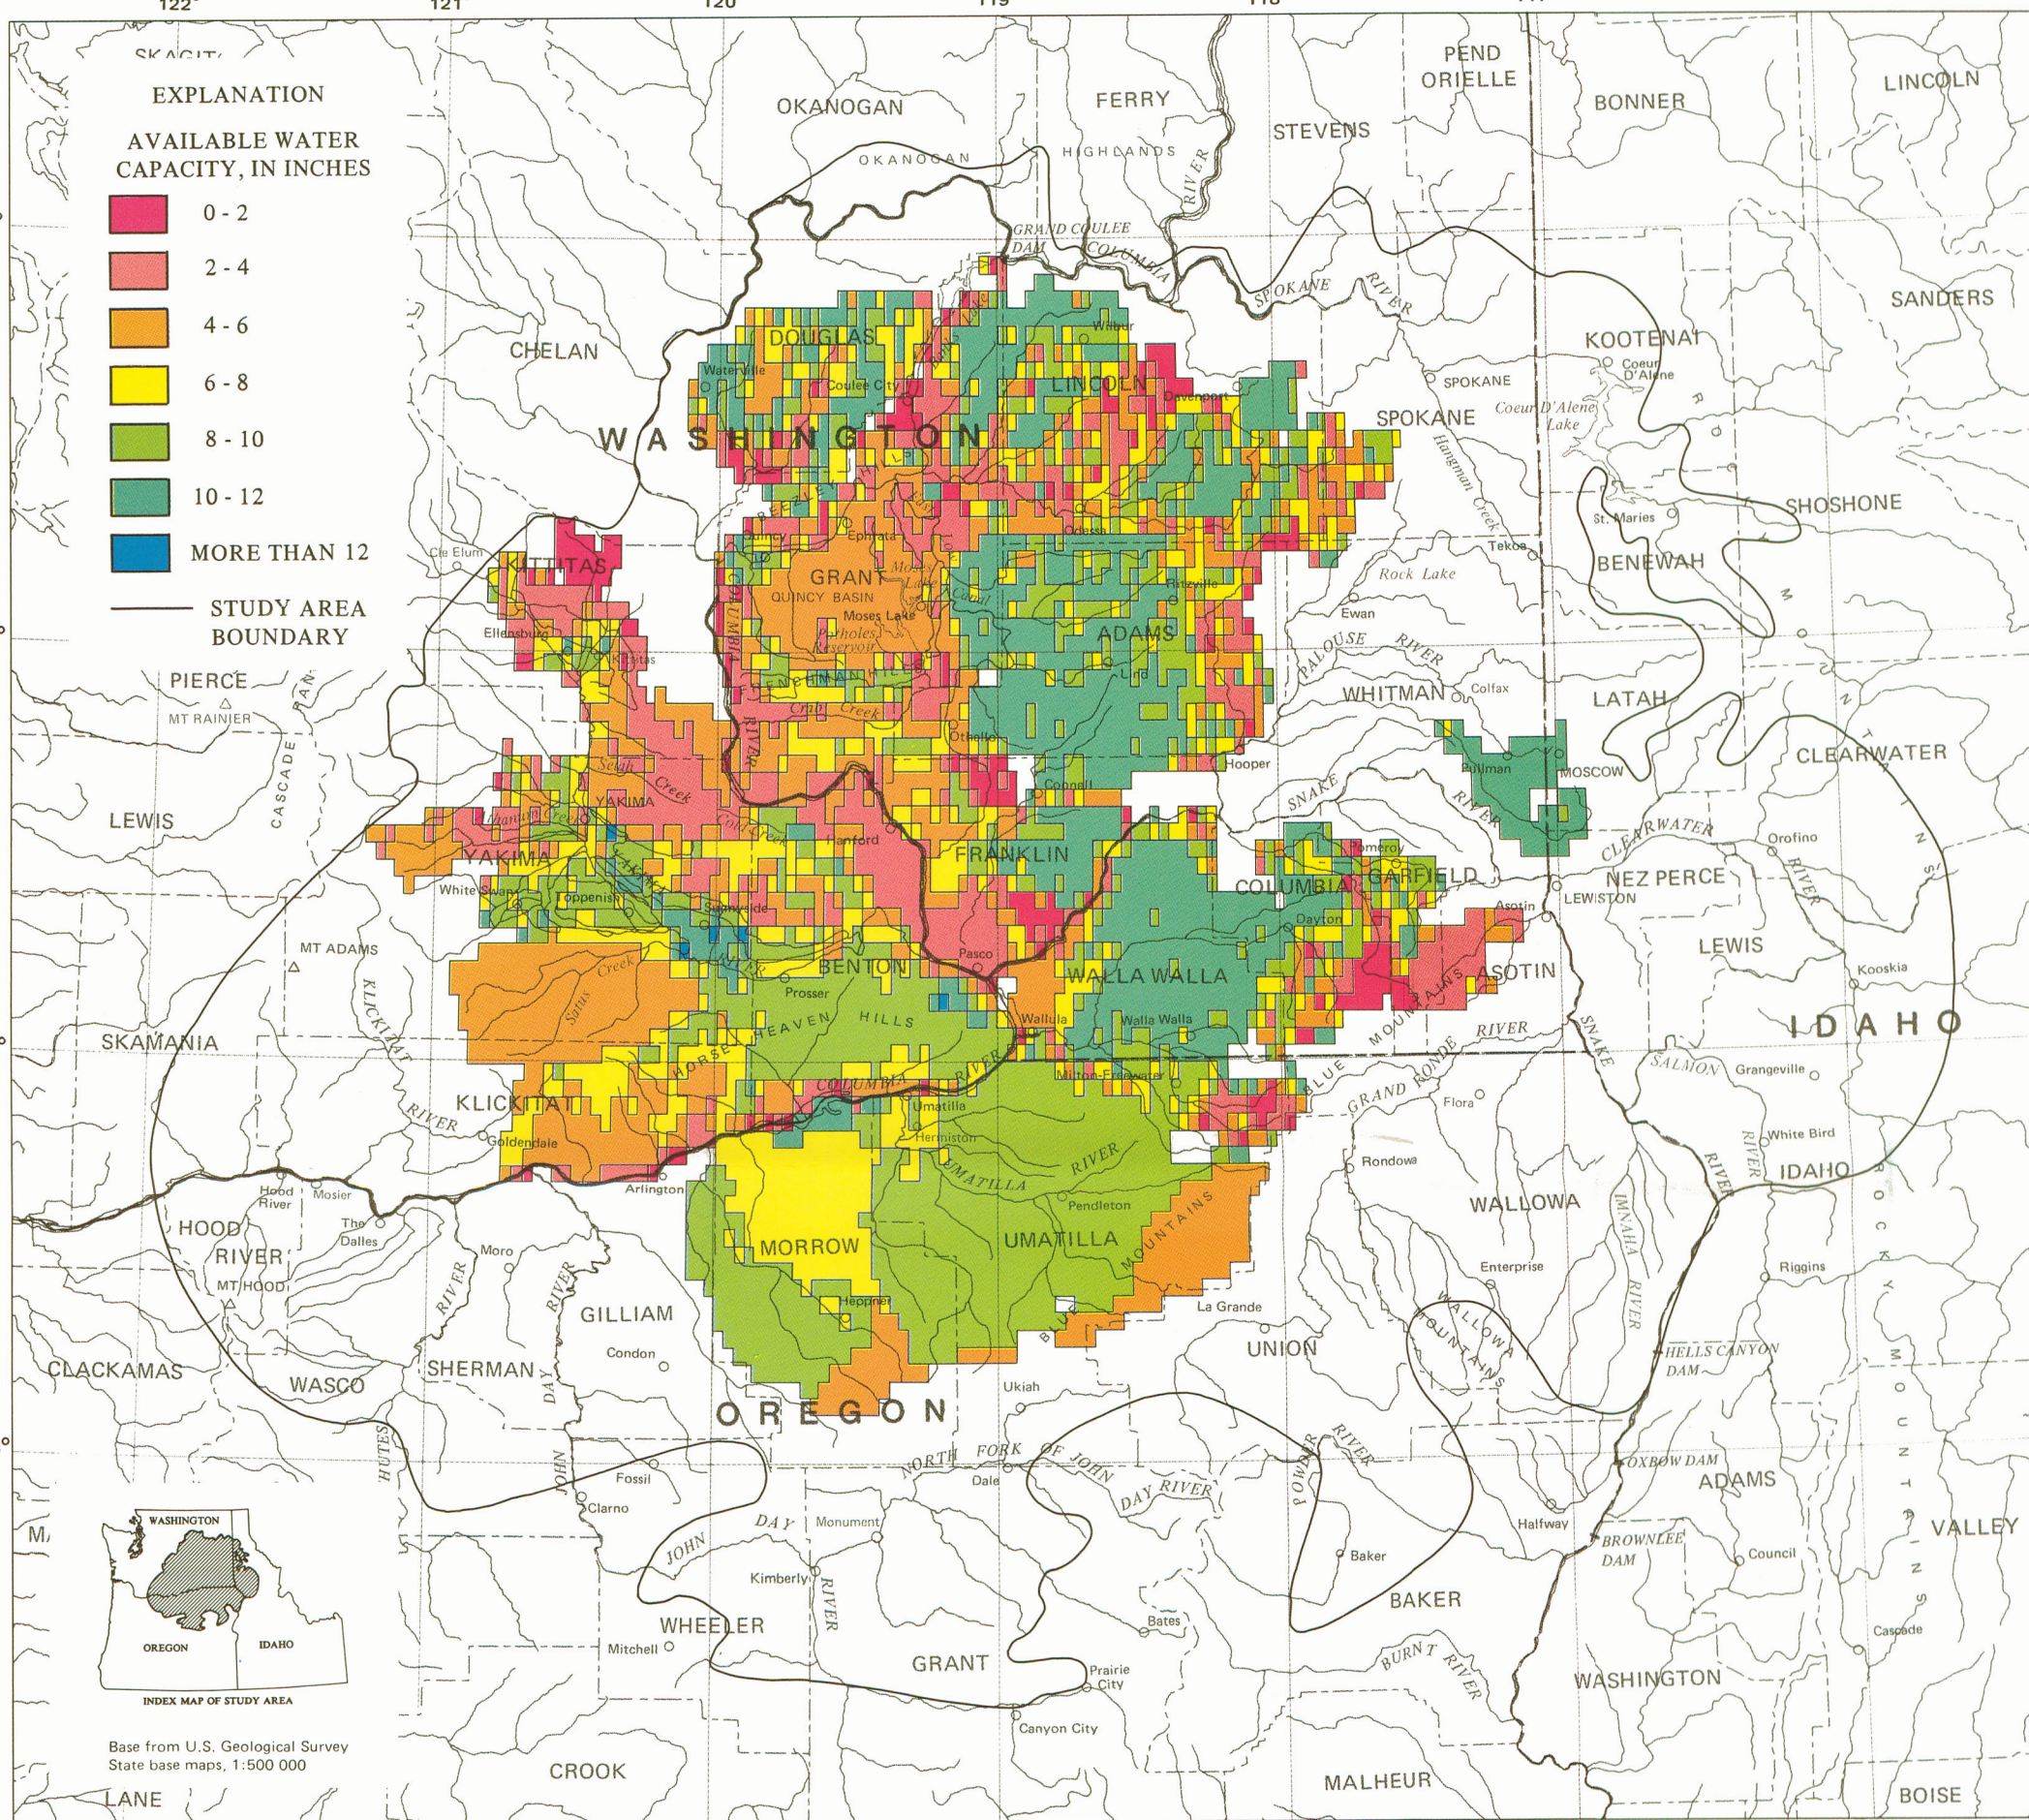

Figure B.—Distribution of total available water capacity in the upper 5 feet of soil for the modeled zones.

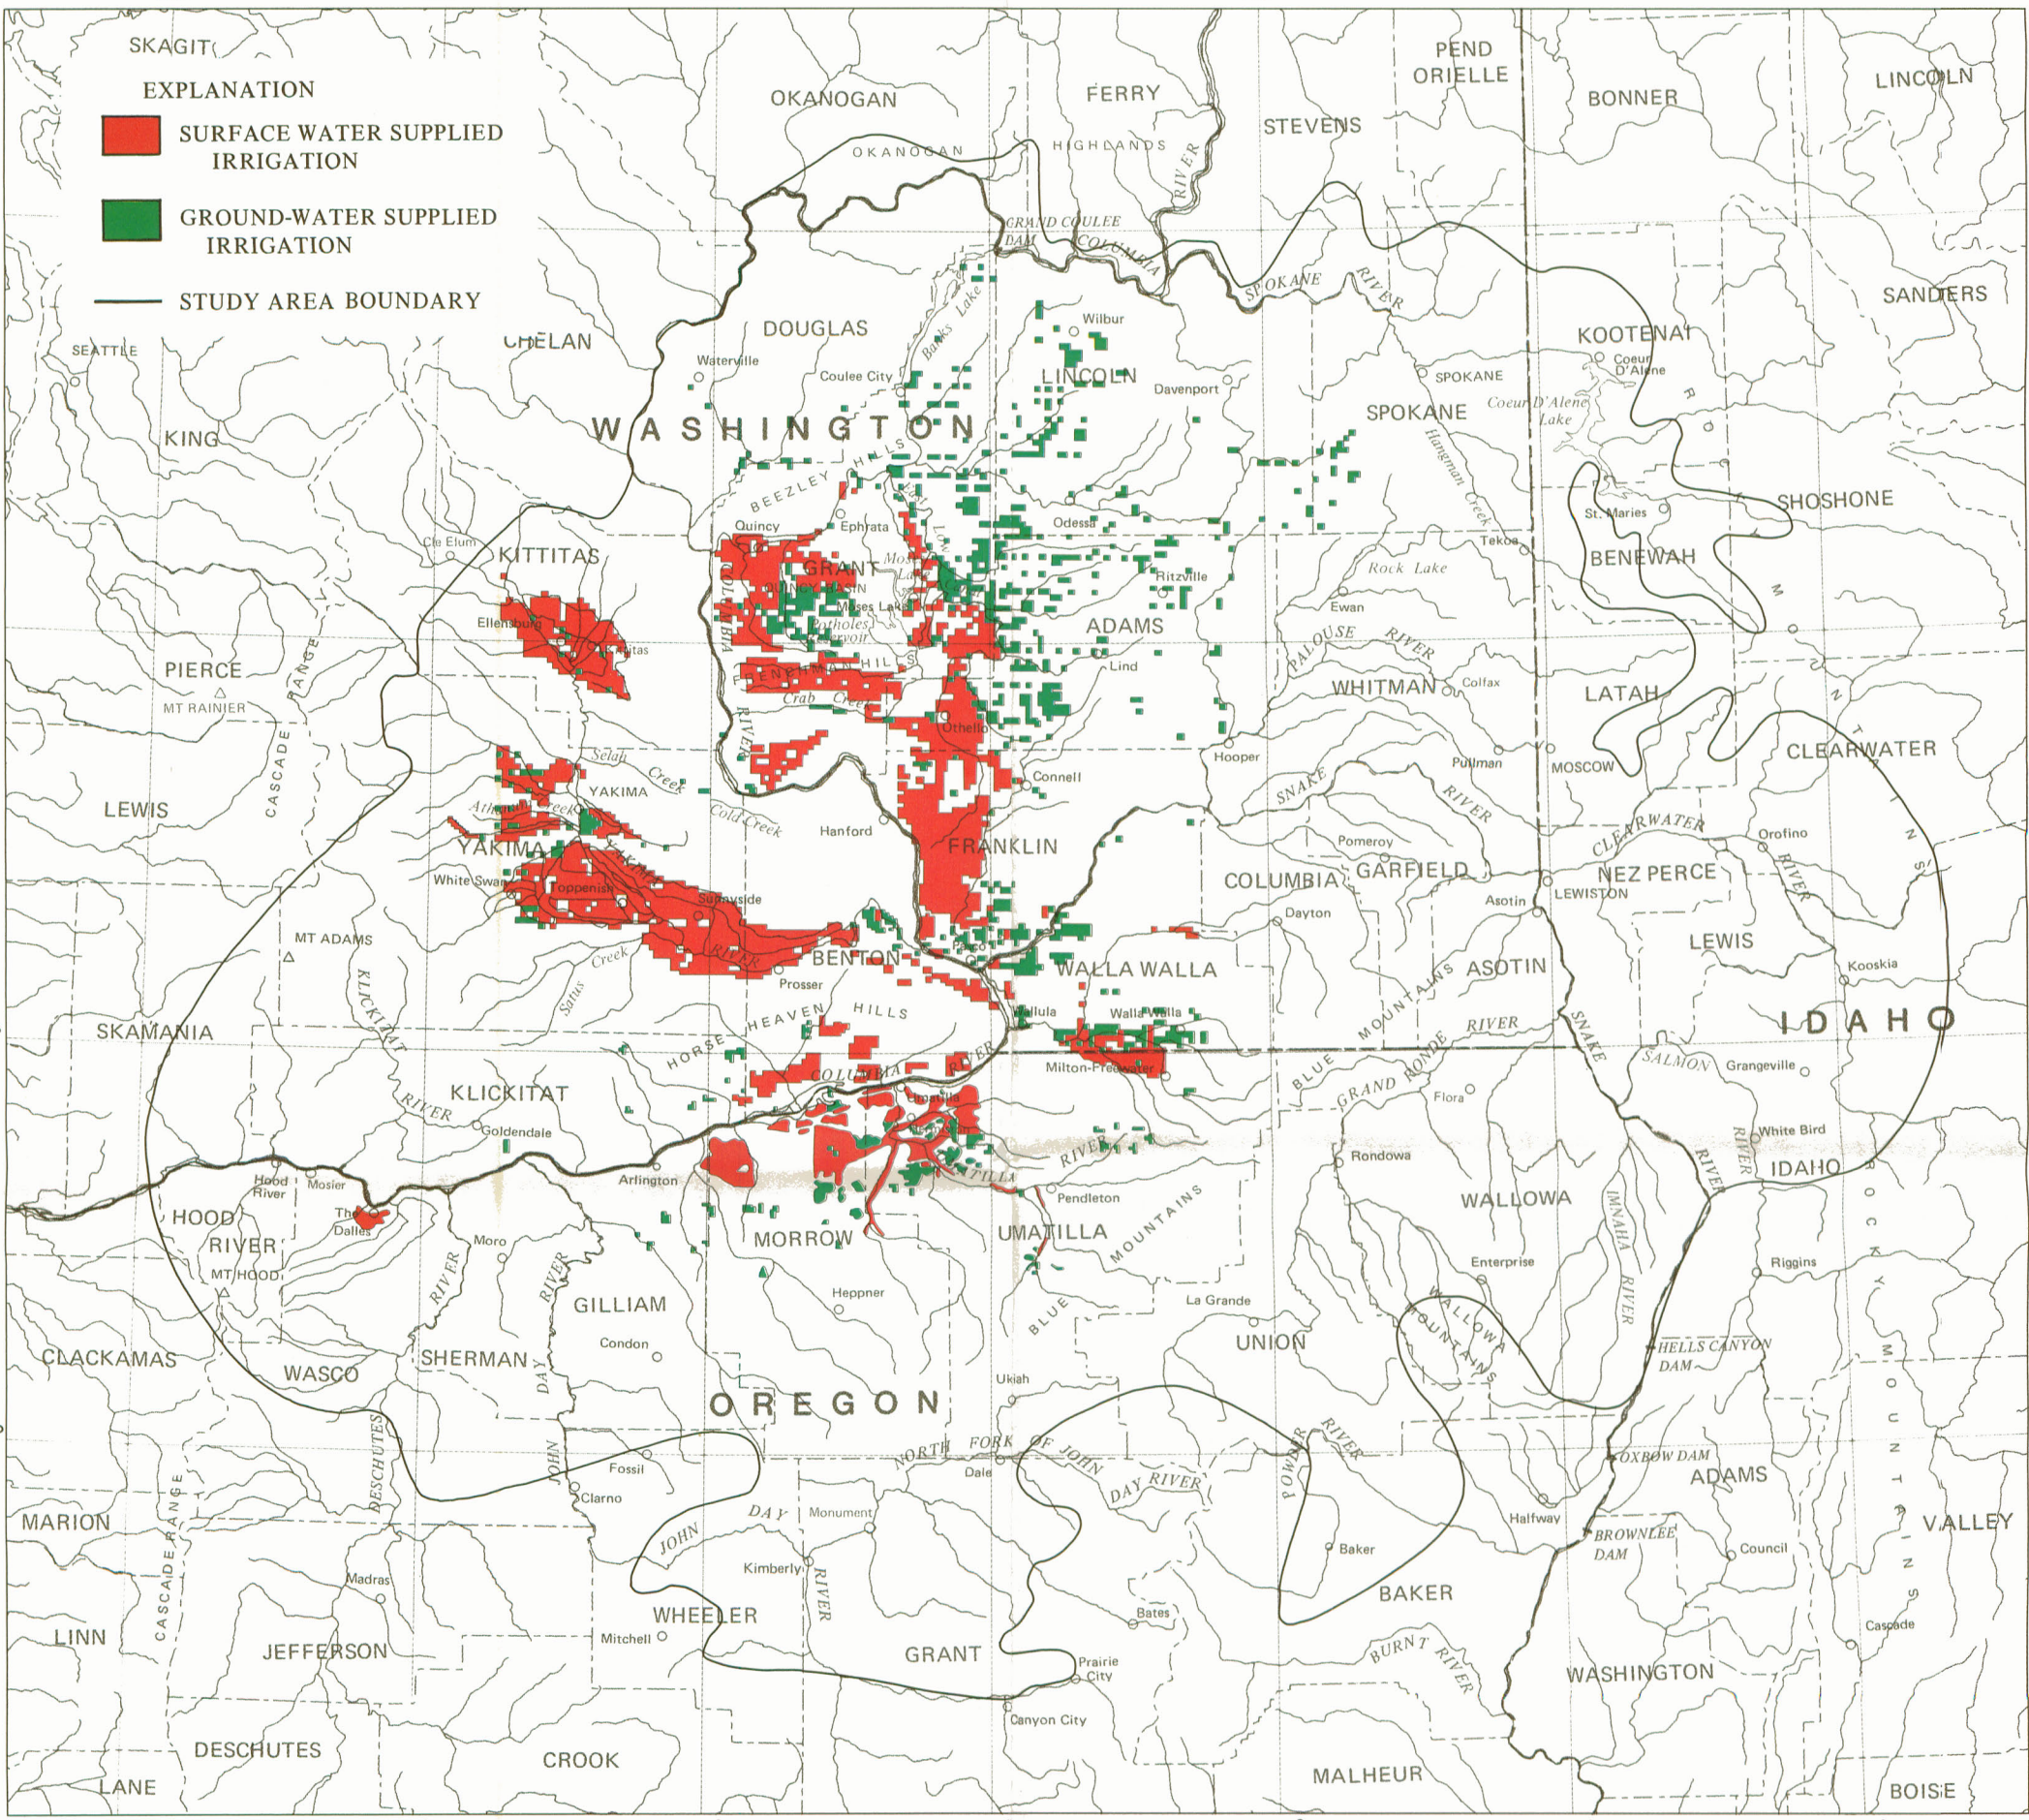

Figure D.—Distribution of irrigation application water.

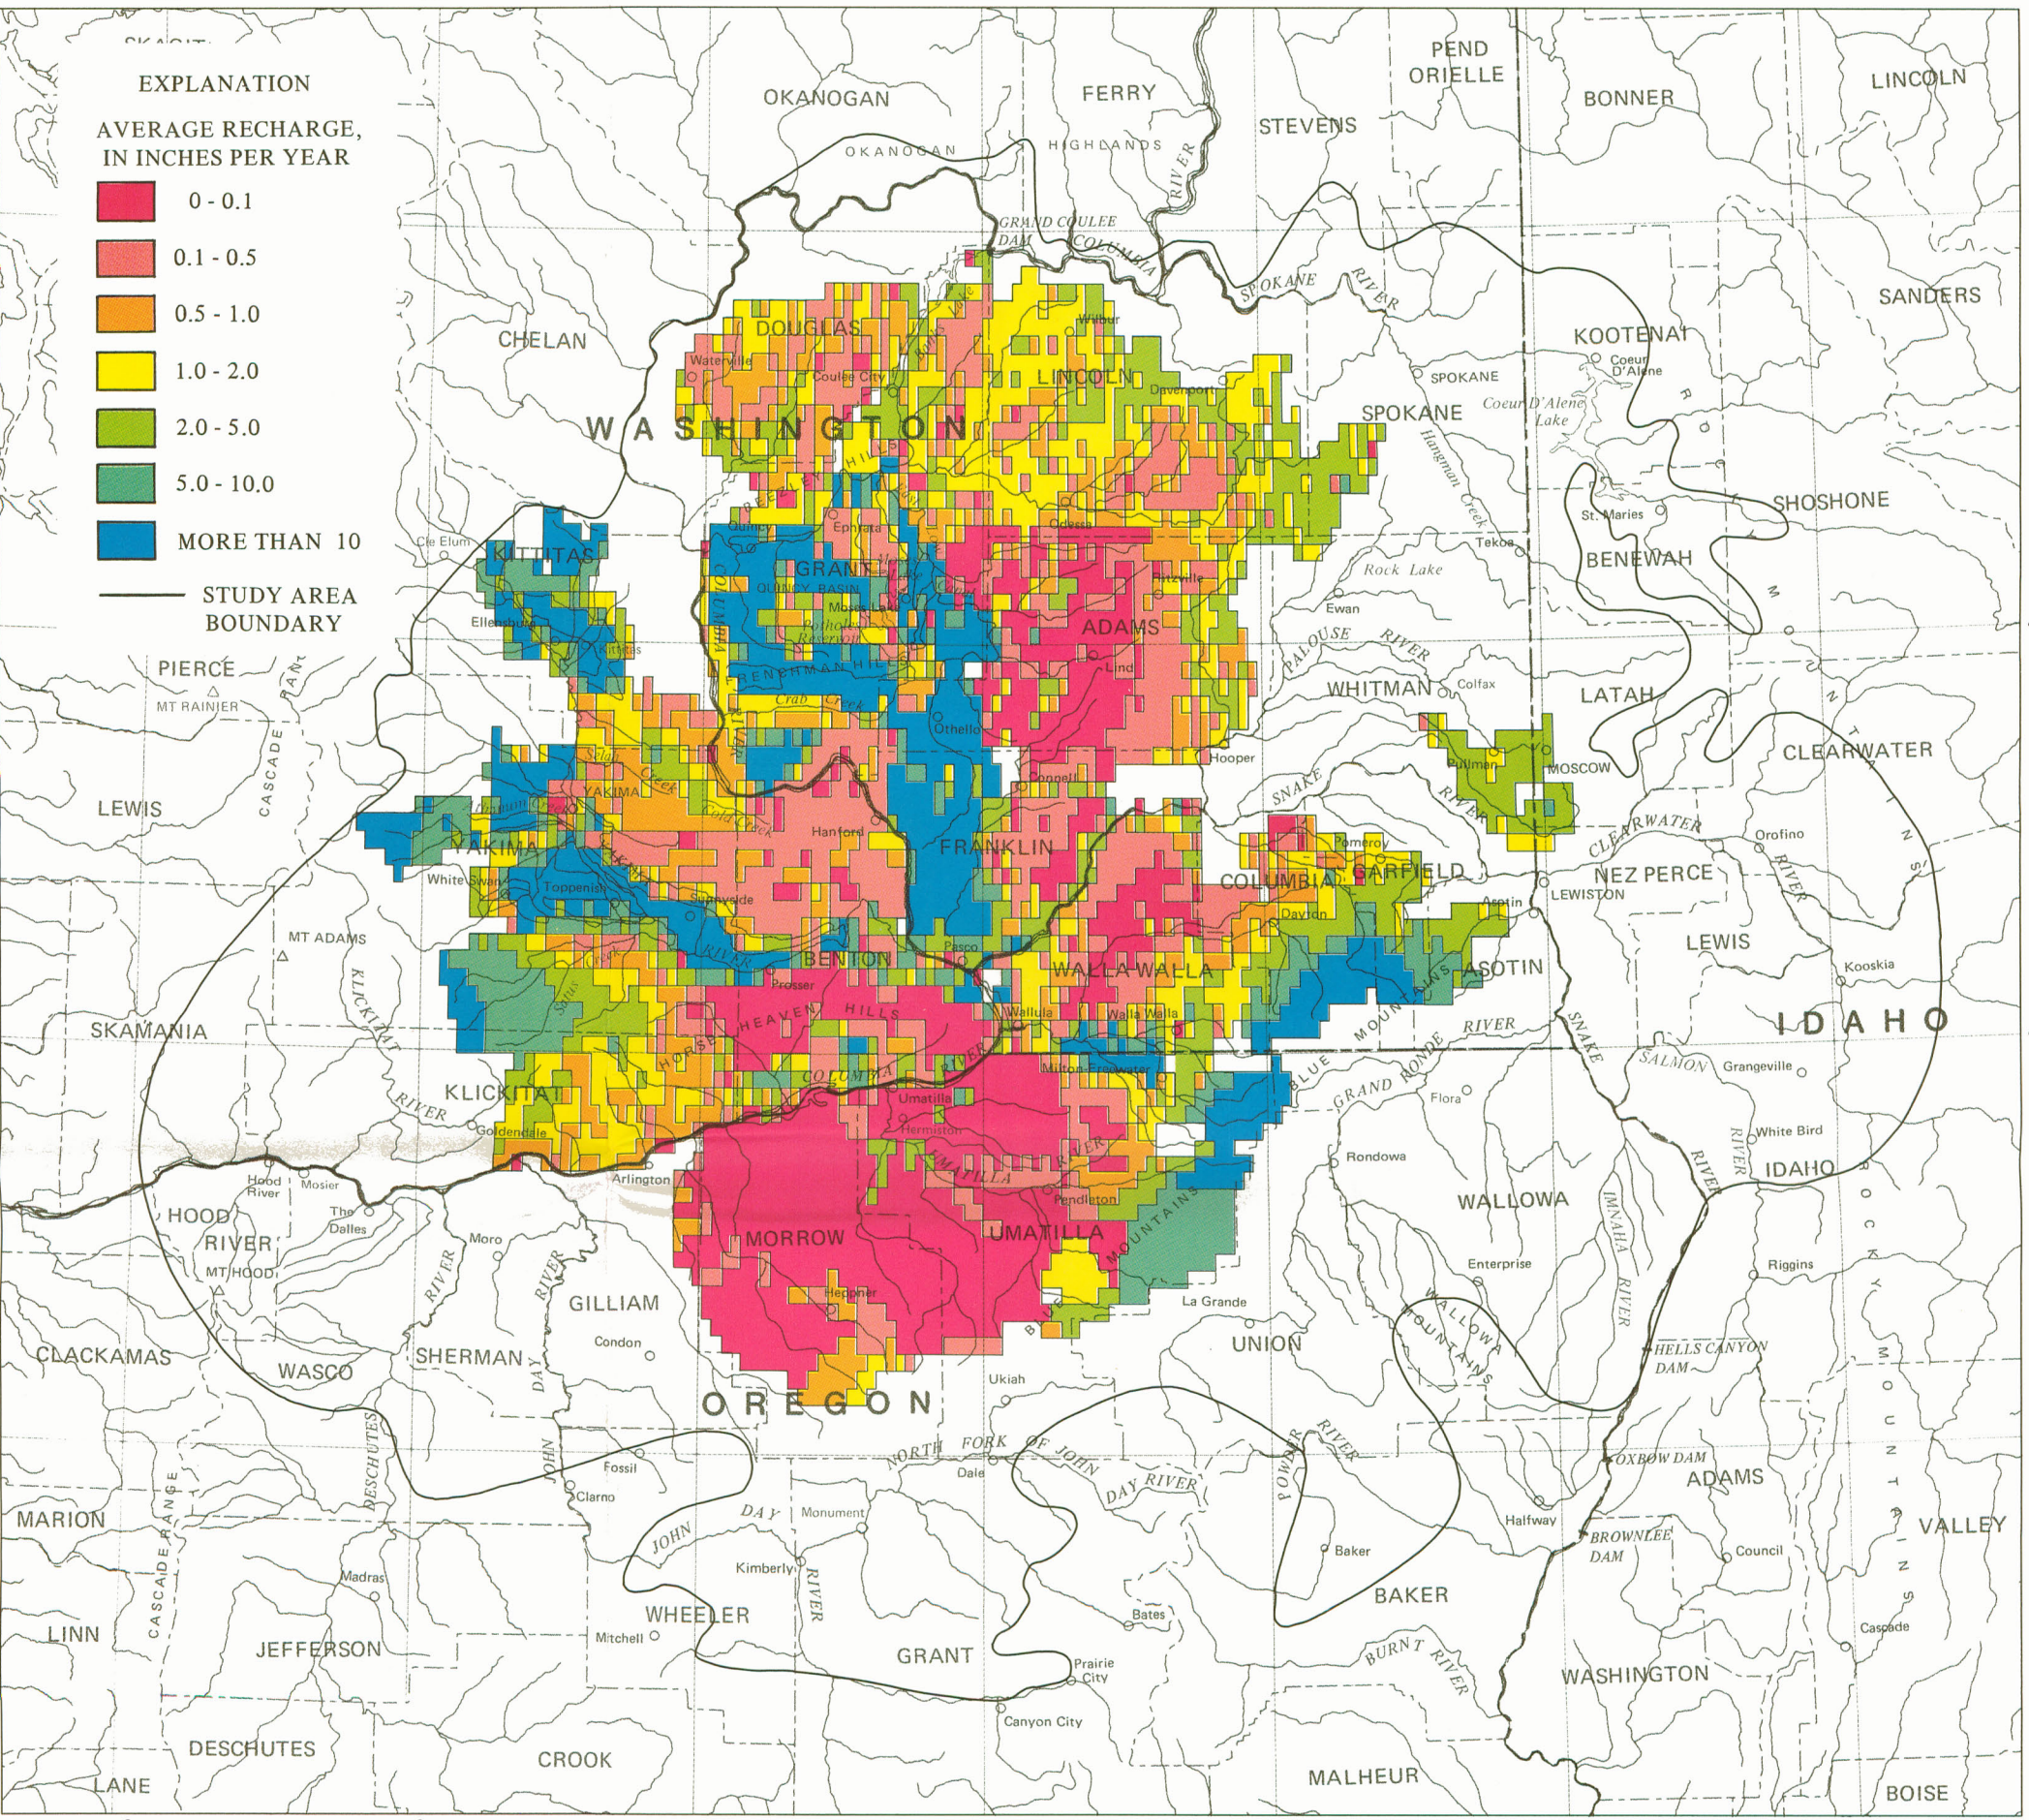

Figure F.—Estimated recharge distribution for current land-use conditions for the modeled zones imposed on the ground-water model grid system.
