

- EXPLANATION**
- 0143850 ▲ STREAMFLOW-MEASUREMENT STATION AND STATION NUMBER
  - 405 ● ALTITUDE OF WATER LEVEL IN WELL, IN FEET ABOVE SEA LEVEL
  - 400 — WATER-LEVEL CONTOUR, DASHED WHERE UNCERTAIN— Shows altitude of water table. Ten feet below 420-foot altitude and 20 feet above 420-foot altitude
  - 378 ● ALTITUDE OF WATER LEVEL IN PUMPED WELL—Hachures on contour indicate local depression in water table. Exact configuration of cone of depression unknown
  - A—|—A' TRACE OF CROSS SECTIONS SHOWN IN FIGURE 2
- Geology by Sevon and others (1989)  
Senior, L.A., 1994, Geology of, and nitrogen and chloride in, the glacial aquifer, Milford-Matamoras Area, Pike County, Pennsylvania; U.S. Geological Survey Water Resources Investigations Report 93-4109

**WATER-LEVELS AND CONFIGURATION OF THE POTENTIOMETRIC SURFACE  
IN THE GLACIAL AND BEDROCK AQUIFERS.**
